

Utility Support Uprights

It's never too late to upgrade your workplace! Treston's Utility Support Uprights (USU) are the ideal solution to adding utility and tools above the workspace. These adjustable cable channels can be configured to suit a range of power, gas, and data needs, while also providing [shelving storage](#) above the worksurface.

Powder-coated steel uprights can attach to [Treston workstations](#) or your existing tables. USU uprights are attached directly to a top and allow for easy access to utilities without reducing the usable work surface area. Cable channels hide cords and hoses, creating a clean work space.

- available in 3 width options (M48, M60, M72)
- can be equipped with shelves, horizontal channels, and dividers
- services can be connected via overhead service carriers, or from underneath the surface through the mounting bracket
- powder-coated steel in our standard light grey
- attach to Treston workstations or existing lab casework

Utility Support Uprights (7)
