

Pro Series Workstation

The Pro Series 930 and 940 Adjustable Height Workstations combine rugged industrial performance with a contemporary cantilever design that enhances ergonomics and user comfort. Available with hand crank or motorized height adjustment, these workstations provide the flexibility to support seated and standing work while maximizing legroom and workspace efficiency.

- Cantilever leg design eliminates front supports for unobstructed movement and greater knee and leg clearance.
- Available with manual hydraulic hand-crank adjustment (930 Series) or quiet push-button electric adjustment (940 Series).
- 12" height adjustment range allows users to easily transition between sitting and standing positions.
- Supports up to 500 lbs. during adjustment, making it ideal for demanding industrial and technical applications. (750 lbs at mid height, 1500 lbs fully lowered)
- 940 Series electric models adjust smoothly with the touch of a button, completing the full height range in approximately 32 seconds.
- 930 Series manual models feature a smooth-operating hydraulic hand crank for precise height positioning.
- Wide selection of worksurface options available, including laminate, ESD laminate, maple block, stainless steel, and specialty surfaces.
- Ergonomic 1-1/4" thick worksurface features a comfortable 180° rolled front edge, with ESD models available for static-sensitive environments.
- Compatible with instrument shelf and MTS uprights and accessories.
