For a Better Work Environment

# DEDICATED TO HUMAN WORKSPACE

**Treston is among the world's leading suppliers of industrial furniture and workstations.**

Our workstation design and implementation process always begins with the person performing the work. In this way, we pay close attention to ergonomics, functionality and efficiency.

The four cornerstones of our operations are customer-focus, reliability, high quality and continuity. We listen to your needs and reliably deliver high-quality and durable solutions, which last from one generation to the next, thanks to our optimal design.

Our own sales network and distributors dedicated to our products provide worldwide assistance and service in support of Treston products.

# Industrial furniture and workstations for different working environments

Treston's product range is divided into three categories, a separate catalog is available for each category. Please contact a Treston representative or email us at: [infousa@treston.com](mailto:infousa@treston.com) to get your own copy.

## Distinctive workshops

Our workshop drawer cabinets, tool panels and workbenches are designed to withstand heavy loads and strenuous use in workshops, repair shops and industrial environments.

The long lifetime of our furniture guarantees productivity and a satisfied user. Our workshop furniture is also well known in teaching environments.

## Ergonomic workstations

The seamless efficiency of material flow is emphasized in assembly workstations.

Process changes in production or operations require reconfigurable workstations that take into account an individual's ergonomic requirements. Our modular product solutions allow you to react to new situations and the resulting needs in an agile manner, enabling smooth, continuous operations. Thanks to our extensive selection of accessories, we are able to satisfy even the most challenging requirements.

Treston design and years of experience enable us to customize each solution to best suit its purpose. For the needs of the electronics industry, we make ESD-protected workstations, suitable for furnishing EPAs. These workstations are also highly suitable for precision mechanics and mechanical engineering.

## Swift in-house logistics

Treston storage furniture encompasses both ease of use and design. Our selection provides solutions to a broad range of storage challenges, regardless of the users and sector.

Our plastic storage drawers are durable and easy to clean, and can be customized into a complete storage system if necessary. Our product range also includes various stand and trolley solutions, for the more efficient use of storage space and easier movement of stored goods.

We also have storage products for environments that require ESD protection. In addition, some of our storage solutions are molded from recycled plastic.

Packaging and shipping departments are often found at the end of production processes. Their logistic efficiency can be easily improved through sensible workstation design.

A great deal of manual labor and quality assurance is typical of the packaging stage, in both individual stations and line solutions. Our solution for the needs of these segments often builds on the idea of "more for less".

When accessories are located and positioned according to LEAN principles, you can significantly speed up throughput and reduce work strain. Cutters, pens, knives, trash bins and displays can be positioned in a way that provides the user with the best possible ergonomics, while also ensuring a free and uncluttered workspace.

# Workstations for every need

Optimizing workstation functionality may prove difficult without well chosen accessories that increase usability. When a workstation is well planned and well equipped, workflow becomes easier and more efficient, improving ergonomics and making it easier to keep tools in place.

## Modular means adaptable

Our world keeps changing at an ever-increasing pace. Until recently, products could be manufactured the same way for decades, but now we must be prepared to make changes to our work practices at a much faster rate. In order to revise the production process to meet new requirements, an extremely flexible and adaptable workstation system is essential. Our system is designed particularly with this in mind. The same basic units, equipped with accessories that meet your needs, offer a wide range of applications.

## Customized for your application and your operators

The purpose of a workstation determines its basic requirements and accessories. The needs and requirements may change considerably from one employee to another, and we understand that no two people are alike. When a workstation is equipped for and adjusted to an individual's needs, each phase of the production process can be completed without delay, with accuracy and with maximum comfort.

Treston offers a wide range of ergonomic workstations to choose from, from those that can be delivered quickly to those that provide versatile options to meet any need.

## STRESSTECH: CUSTOMER TESTIMONIAL

Stresstech and Treston have collaborated successfully for over 20 years. Stresstech emphasizes good quality, long life-time and open communication as key drivers of success.

Stresstech uses a wide range of Treston products both in EPA areas and workshop environments, and also in their quality inspection solutions.

Check this video to get more details: <https://youtu.be/5mk8m2lUxNA>

## Ergonomics in our workstations

Costs associated with health and safety problems are an ever increasing concern to all industries. This concern drives industries to seek solutions to provide a healthy, safe and productive working environment. **Designing a workplace with ergonomics in mind improves the employees' wellbeing which in turn improves productivity.**

The modular design of Treston workstations enables proper ergonomics. With a wide range of accessories and adjustments we can provide customers with a customized solution using standard components. **Modularity and accessories are individually adjustable according to the task and operator requirements.** The aim is to

create an uncluttered workstation and utilize the available workspace as efficiently as possible.

Treston's workstations and accessories can be adjusted for operators of different heights working with left or right hand. Correctly adjusted workstations decrease stress in the muscles and enable productive work throughout the shift.

Proper ergonomic design is more than just correct posture. Real ergonomic design has to do with proper lighting, noise absorption, body movements and air quality. More information about lighting ergonomics on page 45.

### **FREE EBOOK:** Increasing productivity with proper ergonomics

This informational e-book will help you to become better educated on ergonomics and its relationship with industrial workstations. You'll learn how ergonomic environments have a direct influence on employee well-being, the reduction of time and waste, and ultimately, greater productivity.

### **Location of the correct view angle**

Focus point should follow these guidelines:

- Continual movement of view should be in 30 degree sector
- Continuous view angle should keep the head in a comfortable position (line of view should be 10 to 40 degrees below the horizontal line)
- Displays should be positioned 20 degrees below the horizontal line

## Seated or standup work?

The choice of a seated or standing working position is dependent upon the task to be executed. The height of the work surface is determined by such factors as size and weight of the part, precision requirement, assembly process, repetitiveness etc.

Height adjustability is especially useful when the size of the products being handled varies or when several people use the same workstation.

Standing work

Seated work

## Reaching distances and heights

To improve working postures in assembly work, the most-often used parts should be placed into the optimal horizontal working area within the operator's sight. Avoid overly large or deep workbenches, which can cause improper reach and reduced productivity. Assembly work is most ergonomic when parts are within easy view and reach.

The vertical work area and reach zone can be fine-tuned with accessories. Our height adjustable arms optimize work movements and keep parts or tools within easy access. Operators can work with wrists and arms in optimal posture with shoulders relaxed. Tilted bin rails and shelves keep the wrist in a neutral position when picking parts. The tilt angle also provides easy identification of the parts with the proper viewing angle.

Lighting ergonomics, see page 53.

## ESD protection guarantees a safe working environment

**In the electronics industry, work is often carried out in an EPA that is protected from static discharge.** Protection in this case means effective grounding, which involves both grounding equipment and painting the frame of the ESD workstation with semi-conductive paint.

### **FREE EBOOK:** 6-point checklist for creating and maintaining ESD-protected areas

This informational e-book lists 6 steps for setting up an ESD-protected area in your workplace. No matter whether you need just one workbench or a full-scale production line, the same principles apply to ensuring that ESD protection functions as it should.

[www.treston.us/esd](http://www.treston.us/esd)

We have extensive experience in developing, manufacturing and supplying ESD workstations. All our workstations and related products are supplied with an electrically semi-conductive coat of paint and we supply workstations, seats and grounding components for ESD-protected workstations. Our products meet the requirements specified in the IEC 61340-5-1 standard.

### **Static electricity**

The abbreviation ESD stands for Electrostatic Discharge, a process that occurs between two objects of differing electric potential. Normally, electric charges are discharged slowly from objects' surfaces. If the difference in electric potential becomes too great, the electrical current accelerates resulting in a sudden current surge.

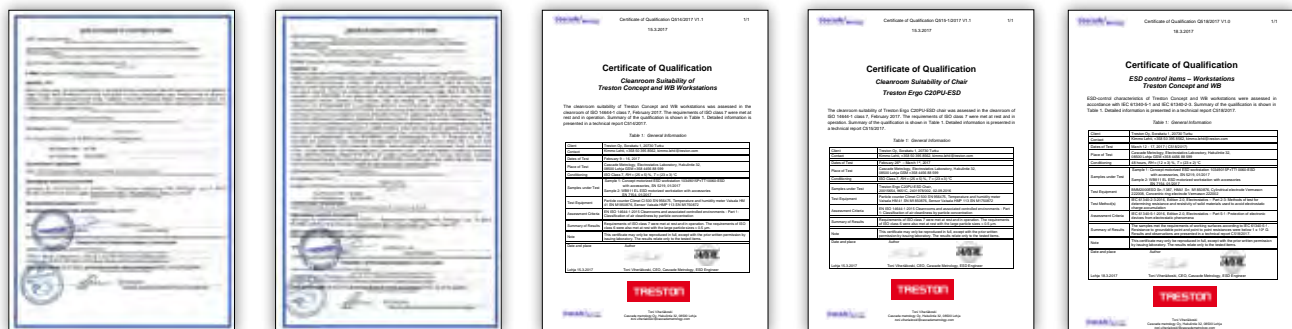

An ESD protected area is called an EPA. In an EPA, ESD protection must be observed in all materials, employees' clothing and air humidity. Workstations and employees in an EPA must also be grounded with protective resistance (1 Mohm) to an ESD ground.

# Our standards comply with the highest certification requirements

<b>Quality certification</b>  ISO 9001 : 2008	<b>Environmental Management System certification</b>  ISO 14001 : 2004 + Cor 1 : 2009	<b>Packaging treatment following to EU directives.</b>	<b>ESD-approval certification</b>  Our ESD products fulfill the basic requirements of IEC 61340-5-1.	<b>GS certification for lighting and TP workbench</b>

The guarantee period for products manufactured by Treston is 5 years from the date of delivery; this excludes workbench tops, trade parts, electronic components, custom made articles and moving parts, for which there is a guarantee period of 2 years.

# Workbenches

## TP frame

Page  
16

- Steel structure
- A cost-effective entry level option
- Easy to equip with a variety of accessories
- Load capacity up to 660 lbs

## Basic Upright frame

Page  
20

- Ideal for lighter use
- May also be used without a worksurface as accessory support behind conveyors or machines
- Load capacity up to 660 lbs

## Cornerstone frame

Page  
22

- Ergonomic and highly adaptable to the needs of the user
- Easy to reconfigure thanks to the modular design
- Suitable for loads up to 1500 lbs
- Offering a wide range of accessories to meet any need

## LMT frame

Page  
28

- Economical motor adjustment
- Ergonomic and highly adaptable to the needs of the user
- Wide height adjustment range
- Offering a wide range of accessories to meet any need
- Load capacity up to 660 lbs

## Concept frame

Page  
32

- Available in manual, handcrank and motorized height adjustment options
- Easy to reconfigure thanks to the modular design
- Suitable for loads up to 1 100 lbs
- Offering a wide range of accessories to meet any need

## TowerLine frame

Page  
38

- Easy to reconfigure, serving customers' changing needs
- Wide variety of layout options from two-sided to corner solution and line extension
- Easily expandable with add-on sections
- Back to back solution with same frame
- Integrated cable management
- Load capacity up to 660 lbs

## TP workbenches

The classically designed TP workbench is the ideal basic bench, the simplest and the most cost-effective option in our range of workbenches. TP workbenches are standard benches that are suitable for a broad range of tasks and environments when fitted with accessories: testing, packing, repair, inspection. TP bench is rated for loads up to 660 lbs.

Designed for use in today's production and assembly environments, this definitive modular system, developed over more than 35 years, provides a high quality working environment. Customize your workstation to your own requirements.

### Stepless height adjustment

The height of workbenches in our TP range can be steplessly adjusted from 25.6" to 35.4", which makes these benches suitable for work while sitting or standing.

- Standard and cost-effective workbench
- Suitable for a wide range of tasks and environments
- Superior range of accessories, easily reconfigured
- Steel frame with loading capacity up to 660 lbs

# Designing TP workstations

**TP workstations** are available in several sizes, with ESD and nonESD options. Uprights and accessories can be added to optimize functionality and increase usability. See pages 42-73 for accessories.

## TP Workstation

Order No C12041302 •

- = products in stock with quick shipping time (1-2 weeks)
- = products that are not stocked but have shorter delivery times (3-4 weeks)

# TP workbenches

- Stepless height adjustment with allen-key between 25.6" - 35.4".
- Frames are of epoxy powder coated steel in grey RAL 7035.
- Slotted uprights (ordered separately) allow to attach a wide range of accessories. Accessory frame required for slotted uprights.
- Worksurfaces included.

## Laminate bench top

- 1" low pressure laminate
- Light grey surface
- Plastic edging

## ESD bench top

- Grey laminate surface
- Grey edging
- Thickness 1"
- Static-dissipative (ESD)

Accessory frame

The TP bench can be equipped with casters! See page 50.

## Packing bench TPB918 is a well thought-out, safe and easy all-in-one choice

This packing table adapts and grows according to your needs. You don't need to know what your business will look like in two years' time, as you can add and remove accessories as you go. Start small and add from 50 or more accessories based on your needs. TBB918 comes in one flat pack and is also easy to assemble. Perfect packing table option for cost-conscious users.

Read more about Treston packing benches from our separate brochure, or check the selection on page 136.

## Cornerstone® workbenches

**Cornerstone® worktables are standard tables that are suitable for a broad range of tasks, including but not limited to: testing, packing, repairing, inspecting.** The Cornerstone® table is rated for regular use with weights up to 1500 Lbs. This degree of strength is achieved by using a solid table structure. The slotted upright frame allows for the use of different accessories.

### Manual height adjustment

The height of our Cornerstone® range can be adjusted from 24.75 to 37.64 inches, in 1 inch increments, making these tables suitable for work while sitting or standing.

- 4-legged steel structure
- High load capacity for even the toughest environments
- Easily equipped with accessories

- = products in stock with quick shipping time (1-2 weeks)
- = products that are not stocked but have shorter delivery times (3-4 weeks)

## LMT - Light Motor Table

**LMT is a light duty motorized ergonomic multi-purpose worktable, that can be equipped for many environments. The LMT system is well suited for light industrial, laboratory, light assembly, quality control, packaging and technical offices.**

LMT is designed to meet ergonomics standards for users in both seated and standing positions. Table frame is quickly adjustable by using an integrated linear actuator system, providing height adjustment from 25.39" to 45.08". A 1" thick worktop is included in non-ESD or ESD options. A wide range of accessories is available using Treston upright modules M40, M48, M60 and M72. Load capacity of the worktable is 330 lbs\*, evenly loaded. Load capacity of the uprights is 176 lbs, evenly loaded.

\*If your application calls for a motor station with greater load capacity, please see page 32 for information on our heavy duty motorized workstations.

- Multipurpose motorized workbench for any light-duty use
- 20" height adjustment range, especially well-suited for standing work
- Comprehensive range of accessories to meet any need
- Easy and quick to adjust

**WATCH THIS ANIMATION** showcasing the versatile usage options of our technical furniture: LMT | <https://youtu.be/wQmp0TxcNOY>

# Designing LMT workstations

**LMT workstations** are available in 40", 48", 60" and 72" widths, as well as an ESD option. Accessories can be added to optimize functionality and increase usability. See pages 48-71 for accessories.

## Concept™ workbenches

Concept™ workbenches are designed for the needs of the electronics industry, where ergonomic qualities are the most important requirement. There are many possible adjustments, all components fit together seamlessly, and each detail is practical in use.

The workstation adapts to the work process and the needs of the operator. As a result all movements of the operator can be optimized, which in turn increases performance and productivity and decreases work-related stress.

Modular design provides total integration with the existing system and the potential to flexibly adapt to changes in the environment. Concept™ workbenches are typically used in work such as assembly, quality control, and repair.

Concept™ workbenches are also available in motorized and hand crank versions.

- Multiple bench variations with advanced ergonomic features for a variety of environments.
- Highly adaptable to various applications and the needs of the user
- Offering a wide range of accessories to meet any need
- Excellent stability, suitable for heavy loads up to 1100 lbs

# Concept also accommodates the most demanding packaging needs!

**Whatever the packaging need, you can build it from Concept and its modular elements.**

Modules fit together seamlessly, giving you an opportunity to create a complete packaging solution, perfectly matching your needs. Building packaging combinations from varying, yet standard modules makes it possible to create an ergonomically well-functioning packaging solution which is also robust and economic. No need for costly extra modifications or compromises!

Read more about Treston packing benches from our separate brochure, or check the selection on page 136

# TowerLine™ workbenches

**TowerLine™ workstations are designed for use in research, R&D and educational environments.**

Robust shelves enable ergonomic use of measurement instruments and unique cable management system helps to keep the workstation tidy. TowerLine workbenches are available in three module sizes: M48, M60 and M72. The bench top depth is 30" and both ESD and nonESD laminate bench tops are available. The frames are painted with our new standard light grey, RAL 7035 (ESD). The stable steel frame supports up to 1650 lbs. The maximum load per bench top is 440 lbs and each shelf holds up to 176 lbs.

Extension and corner frames are also available. In addition, the single sided workstation can be easily changed into a double-sided workstation by adding a bracket set and bench top and by moving the vertical feet into middle of the horizontal feet. Extension and corner frames include only one middle foot.

- Ideal combination of durability and flexibility for high tech environments
- Easy to reconfigure, serving customers' changing needs
- Wide variety of layout options from two-sided to corner solution and line extension
- Sturdy steel frame with loading capacity of 1650 lbs

## Cable management

The leg of the TowerLine™ bench can support integrated power to organize utilities.

- = products in stock with quick shipping time (1-2 weeks)
- = products that are not stocked but have shorter delivery times (3-4 weeks)

# This is TowerLine:

## Ergonomic, easy to personalize

Like all Treston workbenches, the TowerLine series has been designed to be ergonomically functional. The leg space, height adjustment, lighting, easy re-positioning of accessories as well as many other aspects of ergonomics have been considered.

## ESD compatible

Configured with an ESD work surface, the TowerLine frame meets the requirements of an ESD environment.

## Enables precise work in challenging conditions

The stable steel frame supports up to 1650 lbs. The maximum load per bench top is 440 lbs and each shelf holds up to 176 lbs.

## A tidy, safe and aesthetic solution

Using TowerLine's vertical 'tower' legs and a horizontal rear case, utilities can be hidden, creating a clean and streamlined workplace.

## Makes best use of floor space

The TowerLine bench top is height adjustable from 10.63"-75.39". Double-sided add-ons and extensions aid in maximizing floor space.

Power can be located above and below the work surface.

# Customize, personalize and reconfigure – it's easy!

The Treston TowerLine bench comes in a wide variety of layout options: the two-sided option, corner solution and line extension. Whatever your space planning needs, you will find a suitable combination that can maximize use of space.

**Any TowerLine combination always starts with a starter frame. The extension and corner bench frames are always installed in conjunction with the starter frame, not as stand-alone benches.**

**Work surfaces should be ordered separately.**

# FlexFlow flow-through shelving

FlexFlow flow-through shelving can be used as a standalone solution or integrated into a single workstation or assembly line, resulting in faster throughput, less work in process, higher productivity and managed inventories. Your assembly process as a whole will become simpler and more efficient.

FlexFlow is a flexible solution that allows easy addition and removal of components as the role of the workstation changes. FlexFlow can easily be customised to your application and operator using a wide range of accessories. When FlexFlow is equipped for, and adjusted to individual needs the whole production process benefits.

## FlexFlow module sizes

FlexFlow is based on module sizes in order to allow it to be easily integrated with other Treston workspace solutions and the Multiline transfer system. The available sizes are M30 and M36. Both the width and the depth can be increased by combining standard modules that are M30, M36 and M53 in width, and 35.43" in depth.

# FlexFlow™ Combinations

# Seven steps to assemble FlexFlow™

## A. Frame 1

- Choose the frame support legs (equipped with an adjustable screw, a wheel or a wheel with a brake). 4 pcs per base module and 2 pcs per module extension are needed.

## B. Spacer bars 2-6

- Start with one frame support leg and attach one width and one depth spacer bar to it. Attach another frame support leg to the previously assembled leg with spacer bars. Continue assembling the frame in this way.
- One base frame with four support legs has four depth spacer bars, two width spacer bars and two horizontal tubes (four width spacer bars if horizontal tubes are not used). Horizontal tubes can replace the topmost width spacer bars which frees up all the space between the uprights for items. If the items on the top roller shelf are taller than the upright height, horizontal tubes cannot be used.

## C. Roller top and loading/unloading shelves 7-8

- Assemble the roller tops and attach them to the assembled frame. The heights and angles of the tops should be defined here before assembly. Normally a 3 degree angle is suitable (29.52 inches deep shelf > 1.18-1.57 inches, 35.43 inches deep shelf > 1.57-1.96 inches). Shelf angles should always be checked after assembly and the angle adjusted accordingly.
- Assemble the loading/unloading shelves (if ordered)

and attach them at the correct height either on the loading or unloading end. Adjust the loading/unloading shelf to the correct angle. Please note that too large a difference in the angle (> 3 degrees) between the roller top and the loading/unloading shelf may prevent the item from rolling over e.g. onto the unloading shelf. Roller top load capacity is 440 lbs per roller bed.

## D. Assembly rail pair 9

- The assembly rail pair is used for mounting the roller profiles. You need one assembly rail pair per roller top or per loading/unloading shelf.
- Attach the assembly rails to the ends of the roller shelves and/or the loading/unloading shelf. The rail with longer clips should be on the loading end or the higher end.
- Do not attach the assembly rail with screws if you have a stopper/cover rail at the same end.

## E. Stopper/cover rails 10-11

- The stopper rail is used at the unloading end. It closes the open profile ends, strengthens the roller top and stops the item. The stopper rail is attached either to the lower end of the roller top or to the end of the unloading shelf (if ordered).
- The cover rail is used at the loading end. It closes the open profile ends and strengthens the roller top. It has a cut for feeding the items onto the rollers.

## F. Roller profiles 12-13

- First insert the roller profile towards the rear assembly rail at the higher end and under the longer clips, and then pull it back and insert it under the clips of the front assembly rail.
- The side profiles of the roller top guide the item and therefore flanged roller profiles are not needed on the sides. In the middle of the roller top, you should use either flanged roller profiles to divide the two tracks, or a divider rail pair if solid guidance is needed (e.g. for cardboard boxes or other flexible products). Flexible or heavy items may need additional roller profiles in the middle of the track.

## G. Other parts for assembly 14, 15

- The U-profile is used to prevent the roller profile from opening under heavy loads. The U-profile is the solution recommended for FlexFlows in frequent use. This product is a safety device and is highly recommended!
- Brake for roller profiles
  - Stopper rails are not designed to stop heavy items travelling at full speed.
  - The speed of the item can be adjusted using the roller top angle. The brakes are used in FlexFlow™ to control the acceleration of the item. This is essential for smooth product flow.
  - Brakes are needed on most FlexFlows. They are highly recommended!

# Workbench accessories

# Accessories

Well-chosen accessories optimize workstation functionality and increase usability. When a workstation is well-organized and well-equipped, workflow becomes easier and more efficient, improving ergonomics and making it easier to keep tools in place.

## Modular means adaptable

Our world keeps changing at an ever-increasing pace. Until recently, products could be manufactured the same way for decades, but now we must prepare to make changes to our work practices at a much faster rate. In order to revise the production process to meet new requirements, an extremely flexible and adaptable workstation system is essential. Our system is designed with this in mind. The same basic units, configured with accessories that meet your needs, offer a wide range of applications.

## The module size is used to identify the right accessories

In line with the modular approach of Treston furnishings, a large number of products are organized in multiple module sizes: M20, M30, M36, M40, M48, M53, M60, and M72. The module size refers to the nominal distance in inches between two slotted uprights from the middle of the upright. Most of our accessories are organized by their module size.

## Customized for your application and your operator

The purpose of a workstation determines its basic requirements and accessories. The needs and requirements may change considerably from one employee to another, but we understand that no two people are alike. When a workstation is equipped for and adjusted to an individual's needs, each phase of the production process can be completed on time with accuracy and with maximum comfort.

## Casters

Casters may be installed to provide mobility for reconfiguration, cleaning, or repositioning. Treston workstations can be equipped with casters using M12 attachment hardware. Casters not compatible with Workshop™ workstations.

### Casters

Size	Max lbs	Order No
1. Caster Set Ø 3.93" ESD*		860429-00 •

# Slotted Uprights

**Slotted uprights are the basic element for accessorizing Treston tables.** Accessories are attached to TP, Cornerstone®, Concept™, and Workshop™ tables with the aid of slotted uprights or a pre-assembled slotted upright module. The uprights are attached to the back of the table. Slotted uprights are also available as a retrofit to existing non-Treston tables. The module is extended with an upright, horizontal tube and a tee bracket.

Additional specification details  
can be found on page 153.

### LMT upright mounting bracket

### Module size

The module (M) size refers to the nominal distance between two slotted uprights from the middle of the tube. The module size is used to find the appropriate accessories.

# Lighting

## Lighting ergonomics

**When designing workstations and their lighting, we observe the recommendations of the EN 12464-1 standard on indoor workplace lighting.** These recommendations apply mainly to the actual workstation and its immediate surroundings. The conditions set by the standard must be met in every location where the workstation could be placed. This becomes possible only with adequate ambient lighting or quality workstation lighting. The latter is often the more cost-efficient solution.

When designing the workstation lighting, the requirements of the work are determined first. A task that demands a good eye for detail usually calls for a spotlight. If the viewed object is square, at least two lights are necessary in order to remove shadows. If the viewed object is a level surface, it can be illuminated with one long LED lamp – though it is important to remember to direct any reflections away from the employee.

### Optical ergonomics requires optimized conditions

Optical ergonomics relates to optimal viewing conditions; where the work performed does not unduly stress the eyes, even when working constantly over long periods of time. This requires the viewed object, such as a piece of equipment being assembled, to be at a suitable distance and direction in order to keep eye

movements at an acceptable level and ensure that the details can be seen without problems.

Another important requirement is adequate and glare-free lighting. In particular, poor viewing conditions affect presbyopic people (on average above 45 years of age) whose closest possible viewing-point is at a distance of around 20 inches. If the employee uses reading glasses at work, the position of the viewed object and the lighting require some additional attention.

When optical ergonomics have been integrated in the environment and the working position is well adjusted, you can expect to save time and money due to fewer absences and decreased stress.

**Optical ergonomics requires the viewed object to be at a suitable distance and direction, in order to keep eye movements at an acceptable level**

# Balancer Rails and Accessories

**Tool balancer rails and sliding hooks facilitate the use of heavy equipment.** A tool balancer is attached either to the light/balancer rail, or on a balancer arm attached directly to the upright tube.

# LED Lighting

Treston's dual intensity LED light fixtures feature a **High/Low/Off switch that allows the user to control the amount of light used.** They can easily be attached to light balancer rails, shelves, and other surfaces. Optional magnetic mounting bracket for attaching the light fixture to a metal shelf allows for greater functionality and maneuverability. A pipe mounting bracket has also been introduced for attachment to benches from other manufacturers. LED light fixtures are a great addition to any workstation or workplace, where energy efficiency, durability, and longevity are important factors. LEDs boast a long life span, 10x longer than traditional florescent lamps, and use up to 90% less power than traditional lighting. Treston LED lights have a lifespan of up to 100,000 hours (11 1/2 years powered 24 hrs/day).

## Features

- High/Low/Off switch
- Light balancer rail hardware and power cord included
- Easy attachment to light balancer rails, shelves, and other surfaces
- Optional magnetic mount for attachment to metal surfaces
- Daisy Chain up to 10 fixtures with 1 power source
- Lengths available: 24", 36", and 48"
- Operating voltage: 90 to 264 V ac (50 or 60 Hz), Power factor > 0.95 on high setting at 120 V ac
- Lumen output: 600 (±5%) per foot, typical at 25 °C (77 °F)
- Light color: Daylight white
- Color temperature (CCT): 5000K (±300K)
- Power cord contains simple 3-prong plug, no transformer required
- Swivel bracket available for positioning light throughout workspace
- Built-in skirt/shield keeps light focused on the work space and out of the user's eyes

# Power rails, pneumatic rails, cable ducts and wire management

**Power rails are available in multiple module sizes: M20, M30, M36, M40, M48, M53, M60, and M72.** Cable ducts hide the untidy cables from other equipment. This makes it easy to keep the back of the workstation and its surroundings tidy. Horizontal troughs effectively conceal the cables, without preventing maintenance access. Standard cord length of power rails is 10ft. Power rails are 15 amp units.

M20 19" rack mount bracket 1U	E816040-49
M30 19" rack mount bracket 1U	E810027-49 •
M36 19" rack mount bracket 1U	E810357-49 •
M40 19" rack mount bracket 1U	E823142-49
M48 19" rack mount bracket 1U	E814042-49 •
M60 19" rack mount bracket 1U	E814043-49 •
M72 19" rack mount bracket 1U	E817357-49 •

### Cable ducts

Description	Size W x H inches	Order No
Cable duct M20	18.38 x 14.17	860808-49
Cable duct M30	28.22 x 14.17	860044-49 •
Cable duct M36	34.25 x 14.17	860045-49 •

Cable ducts hide the untidy cables from other equipment. This makes it easy to keep the back of the workstation and its surroundings tidy. Fitted to upright tubes.

### Cable trough

Description	Size W x D x H inches	Order No
Horizontal cable trough M30	29.01 x 3.81 x 1.77	854553-49 •
Horizontal cable trough M36	35.03 x 3.81 x 1.77	854554-49 •
Horizontal cable trough M40	38.25 x 3.81 x 1.77	E823274-49 •
Horizontal cable trough M48	46.73 x 3.81 x 1.77	854555-49 •
Horizontal cable trough M60	58.54 x 3.81 x 1.77	854556-49 •
Horizontal cable trough M72	70.59 x 3.81 x 1.77	854557-49 •
Vertical cable trough	2.04 x 2.44 x 53.54	861130-49

Horizontal troughs effectively conceal the cables, without preventing maintenance access.

- = products in stock with quick shipping time (1-2 weeks)
- = products that are not stocked but have shorter delivery times (3-4 weeks)

Pneumatic Rail

Pneumatic Rail back view

Rack mount rail 1U

Cable Duct

Hide wires and cables with a cable duct.

### Vertical wire management

The vertical cable trough is attached on the side of the slotted upright.

### Horizontal wire management

Attached to slotted upright, the horizontal cable trough enables cables to be hidden at the top of the workstation.

# Shelves

**Our extensive range of shelves includes various component sizes to complete your workstation.** The deepest shelves should be installed at the top, to prevent blocking the work surface. Adjustable shelves and extendable shelves enable more ergonomic and efficient ways of working. The shelves are available in all module

sizes. Steel shelves with lip can be attached at a 0° or 20° angle, and adjustable shelves can be tilted continuously from 0° to 25°. Equipment shelves offer continuous space for storage and equipment. Bookend brackets and lip edges are available options for equipment shelf.

# Upright accessories

## Ergonomics is a wide concept

When a working environment is being set-up, the individual using it must come first. Employees cannot be fitted within a function or system that is only based on technical considerations. Therefore, the concept of ergonomics has to be broadened to encompass all human psycho physical activities. The main objectives of ergonomic design are ensuring employees' health, increasing work satisfaction and improving individual productivity.

A modular product family, a comprehensive selection of adjustable components and a wide range of accessories are our way of implementing ergonomics in the workplace. Our ultimate goal is to ensure a relaxed working position where the work movements can follow the individual's natural way of moving.

## Don't reach for it!

First, the worksurface and shelves are adjusted to the correct height and the required accessories are installed. Then, tools and equipment are placed on adjustable shelf components and adjustable double articulating arm components. When everything is within the user's reach, valuable time is saved and the worksurface is kept clean and organized.

Double arm

Heavy arm

Height-adjustable arm

Light arm with worksurface attachment

Document holder

## When a position changes, the height must be adjusted

Frequent changes in the working position, such as changing from a sitting position to a standing position, require height-adjustable arm (860985-49). The height-adjustable profile (860997-49 in picture) can be attached to any component with arm (such as the monitor shelf arm) that is pulled down and lifted back up according to the working position. The adjustment range is 17.71 inches.

# Bin Rails

**Another way of ensuring an ergonomic working position and saving space is to use bin rails.** The higher the stacks are, the further they are from the workstation. To ensure an ergonomic working position, use deeper brackets on the

top. The Bin rails are available in multiple standard module sizes: M20, M30, M36, M40, M48, M60, and M72. See pages 51-59 for Treston's Treston storage bins and containers.

Bin rail extension brackets bring bin rails closer to the user and ensures an ergonomic working position.

Bin rail with brackets and blue stacking bins.

Light bin rail with brackets and red stacking bins.

Curved bin rail with extension rail

Extension for curved bin rail with arm

Additional specifications and bin rail bin capacity available on page 155.

# UniFit™ Accessory Adapters

UniFit™ Arm adapter brackets have been created to couple Treston's broad range of arm components by simply identifying your upright system, and selecting the adapter arm size to match the Treston arm component you plan to use. Treston arm components can be found on pages 42-43. Retrofit™ and floor mount uprights can be installed on existing work stations, or mounted to the floor to create a single post, or modular bay system. Modular upright bays can be configured in M20, 30, 36, 40, 48, 53, 60, and 72 inch widths. By employing standard bay widths, you can use the full line of Treston accessories, including bin rails, perforated and solid panels, shelving, tool trolleys, and lighting.

# Treston Storage Systems

# Treston Storage Systems

## Well considered, efficient small parts storage

Good storage planning requires the combination of many elements. Treston's Treston® line of storage products offers a flexible and first class range of storage solutions to build an effective storage system. Our range of small parts cabinets, bin cabinets and many kind of storage bins give many options to store a wide variety of items. Our storage bins are molded from sturdy polypropylene and polystyrene, making them strong and stable in all normal conditions. Large label areas offer easy identification of contents, and bin color options are provided for color coding systems. Other options include cabinet turntables and trolleys, offering further flexibility.

Treston's Treston® storage products can be used in conjunction with our workstations, to provide an organized and functional workspace. Storage solutions are suitable for demanding professional use in industry, distribution, retail, healthcare, and education.

High Visibility ESD Awareness labels on all ESD bins, and Storage Systems.

Ground terminal on all ESD Storage Cabinets & Parts Organizers.

## Plastic Bin Material

### Conductive polypropylene = PP

- surface resistivity 103...106 ohm
- volume resistivity 103...106 ohm
- temperature tolerance -4°...+158°F

### Conductive polystyrene = PS

- surface resistivity 103...106 ohm
- volume resistivity 103...106 ohm
- temperature tolerance -40°...+149°F

## Treston® Storage Bin Colors

(11.81"H with ESD cabinet series 290, 22.05"H with ESD cabinet series 550)	

\*Includes ground cord.

Holds small parts storage cabinets of the 550 series, sold separately. See page 74 for options.

**CABINETS SOLD SEPARATELY**

# Storage Bin Cabinets

**Storage of larger items is easily arranged with storage bin cabinets, which are stackable vertically and may be wall mounted or mounted on turntable assemblies.**

Two sizes of frames, five sizes of bins. Comprises a grey epoxy enamelled steel frame (RAL 7045), color bins with backstops and labels with protective shields. The crystal

clear bins are of polystyrene (PS) and the colored bins of polypropylene (PP). The colored bins of cabinet 0440 are of polystyrene (PS). Shelf bins are detailed on page 78. Optional accessories: width dividers, retaining bars, and turntables.

## Retaining Bars

Cabinets for mobile service and maintenance vehicles can be equipped with safety/retaining bars. Set includes 4 pieces. Not available in ESD option.

# Turntable Assemblies

**Compact storage systems for use in maintenance, production and storage areas.** Space saving practical turntable assemblies are ideal for the storage and easy identification of thousands of components. Such assemblies offer storage for up to 1,792 different items on a floor area

of only 6.88 sq. ft. When wall space is limited the turntable assembly, strategically placed, is a huge space saver. Load capacity 1760 lbs. Easy assembly without tools. This unit holds 16 bin cabinets of 11.81" depth, ordered separately.

Holds storage bin cabinets 0830/1630 and 0840/1640 series. See page 65 for options.

\*Includes ground cord.

## High Density Storage Cabinets

**High density cabinets can be used in maintenance areas, stores and many other locations.** Robust construction. Load capacity 528 lbs. Mobile storage option with casters if required. A compact storage system - one cabinet offers storage for up to 336 different items on a floor area of only 2.69 sq. ft. Each cabinet includes a grey epoxy enamelled steel frame (RAL 7035), shelf bins with backstops, labels

and protective shields. Adjustable feet are provided for fine levelling. Load capacity for the cabinet is 528 lbs/66 lbs per shelf. Dividers are available separately. Details of the shelf bins can be found on pages 8-9. Optional accessories: Width dividers, caster set, retaining bars.

### Caster Set

4 casters Ø 3.94", 2 with brakes. Load capacity of cabinet with casters is 330 lbs.

# Storage Bins and Containers

## IC Tube Storage Bin

Storage bins, with smooth sides and bases, are effective space savers. Bin 1562 is specifically designed for storing IC dispensing tubes. Material: conductive polystyrene. Label with protective shield is included with the bin. Shields are not conductive. Accessories: width or length dividers.

Order No	Size (D x W x H)	Dividers (ordered separately)
1562-4ESD	24.60" x 5.51" x 3.54"	V-15-4ESD 

## Picking Bins

Picking bins are intended for repeated and rapid picking. All the inner faces are rounded and the front has a distinctive sloping design. Suitable for bench stand and bin rail. Material: colored polystyrene (HIPS). Color: blue (RAL 5015). See page 44 for optional bin rails.

# Shelf Bins

**Treston® shelf bins provide an ideal way of storing small/medium sized items in maintenance, production and stores.** The shelf bins are particularly suitable for use in small parts retrieval systems and mobile shelving. Four depths are available: 11.81", 15.75", 19.69", or 23.62". Bright colors are available for easy color coding systems. A new grey color has been introduced to this range. Crystal clear bins, even when using the index

label provided, allow visible identification of bin contents. Corrugated bases ease the picking of very small items. Full width label with protective shield is easy to keep clean and change when necessary. The label is included in the price. Optional accessories: width dividers (translucent plastic), labels, blanking piece FP-6M to produce flat surface for adhesive barcode labels on inside rear wall of bins.

Full width label with protective shield is easy to keep clean and change when necessary. The label is included in the price.

Corrugated base eases the picking of very small items.

The shelf bins are particularly suitable for use in small parts retrieval systems and mobile shelving.

Individual bins can be sub-divided internally using dividers, ordered separately. The shelf bins feature a molded in label holder on inside rear wall of bin and on the divider. Labels ordered separately.

Blanking piece (**Order No FP-6M**) to produce flat surface for adhesive barcode labels on inside rear wall of bins. The adhesive labels are suitable for the smooth side of the divider.

# Stacking Bins

## Designed to facilitate easy stock selection and picking.

The open front gives easy access and the corrugated base helps to retrieve contents, especially smaller sized and flat objects. 8 sizes available. Our stacking bins are suitable for stands, trolleys, bin rails, table stand, standard metric shelving, and parts retrieval systems. Bright colors

are available for color coding. A new grey color has been introduced to this range. The crystal clear bin allows visual identification of the contents even when an index label is used. Accessories: width dividers of grey epoxy enamelled steel (RAL 7035). Labels with protective self-adhesive.

The open fronted design allows for easy access.

Corrugated base eases picking of small items.

Bin rail for stacking and picking bins. Suitable for stacking bins 1015-1930, ordered separately. See page 62 for more information.

Full width label with protective self-adhesive shield is easy to keep clean and change when necessary. Labels ordered separately.

Width dividers of grey epoxy enamelled steel (RAL 7035).

The adhesive labels can be fixed to the front side and to the divider.

# Bin Accessories

## Lids for Stacking Bins

Transparent drop-on lids for stacking bins 1015, 1520, 1525, 1930, and 1940. Made of crystal clear PVC. Now available in translucent ESD!

Order No	Suitable Bin	Package pcs
LID-1015	1015	20
 LID-1015ESD	1015	20
LID-1525	1525	15
 LID-1525ESD	1525	15

## Casters for High Density Storage Cabinets

4 casters Ø 3.94", 2 with brakes. Load capacity of cabinet with casters is 330 lbs.

Order No	Size (D x W x H) with casters
PS-LH	16.14" x 23.82" x 38.58"
 PS-LHESD	16.14" x 23.82" x 38.58"

## Retaining Bars for Storage Cabinets

Set includes 8 pieces. Not available in ESD option.

Order No	Suitable Cabinets
A-605	2440 and 4840

## Blanking Piece FP-6M

to produce flat surface for adhesive barcode labels on inside rear wall of bins.

See pages 100-101 for cabinet and bin trolleys.

# Stacking Bin Stands

1 x stacking bin stand BR-2530,  
35 x red stacking bin 1930-5

## Bin stand BR-2530

On BR stands, stacking bins are inclined at a 20-degree angle, enabling the excellent exposure and promotion of products. An efficient storage system for daily use when small components are frequently accessed. This product includes a grey steel frame in an epoxy powder-coated finish and seven fixed, forward-sloping bracket pairs, 36.6" in width. Stacking bins must be ordered separately.

Load capacity 110 lbs and that of the stand 772 lbs.  
Overall dimensions D x W x H: 19.7" x 39" x 60.6".

Suitability:

Stacking Bin	Quantity/Level Pair	Max Quantity/stand
1525	6 pcs	42 pcs
1930	5 pcs	35 pcs

1 x stacking bin BR-4050,  
30 x grey stacking bin 1940-3

## Bin stand BR-4050

This product includes a grey steel frame in an epoxy powder-coated finish and six fixed, forward-sloping bracket pairs, 36.6" in width. Stacking bins must be ordered separately.

Load capacity of a bracket pair is 110 lbs and that of the stand 772 lbs. Overall dimensions D x W x H: 23.6" x 39" x 65.7".

Suitability:

Stacking Bin	Quantity/Level Pair	Max Quantity/stand
1940	5 pcs	30 pcs
1950	5 pcs	30 pcs
3040	3 pcs	18 pcs
3050	3 pcs	18 pcs

## High-performance industrial chairs with a 10 year warranty

**The new Treston chair range offers high-performance seating solutions with maximum customer benefit for any industrial and technical working environment. Our high-quality technical products fulfill the highest requirements, offer outstanding value for money and meet the requirements of various workplaces – from production and packaging to standing work, ESD areas and R&D environments.**

### Industrial workplaces require industrial chairs

Ergonomically sound chair is a vital part of the well-functioning, ergonomic and user-friendly workstation. Good sitting enables effective and appropriate movements, reduces postural fixity and enables good and relaxed working postures. The ergonomic requirements of workplace chairs in industrial and technical environments are inherently different to those of other areas, such as office. The jobs carried out at manufacturing workstations may involve force, precision skills and repetitive movements, and thus the workplace chair must adapt perfectly to these tasks and working environments in order to support the workers – and their well-being- in the best possible way.

### Six models with 36 variations

The new chair range consists of six different models: Multi-purpose Treston Ergo, Treston Plus with an all-inclusive ergonomic package, new generation workplace chair Neon with changeable upholsteries, Flex for standing work, Stool for assistance in workshops and Saddle chair for alternative way of sitting. In addition, there are three surfaces/upholsteries to choose from: a highly resistant polyurethane, comfortable fabric and easy-to-care artificial leather, making it is easy to find the most suitable chair for the working environment from our 36 chair variations.

### Safe, sound and economic solution

Treston chairs ensure safety in the workplace by fulfilling the requirements of DIN 68877 and by carrying the GS safety mark, and in addition, our ESD chairs are in compliance with EN 61340-5-1. Besides being safe and ergonomic, our chair selection has a full 10 year warranty\*. The Treston chair range is a safe, sustainable and economic solution for industrial seating.

\* Saddle chairs 2 years

Find more information about ergonomic sitting from our separate brochure!

## Treston Ergo

Multipurpose chair for almost any application in the industry

- User-friendly and quick adjustability
- Excellent price-performance ratio
- Large, ergonomically designed seat and backrest and lumbar support

## Treston Plus

The all-inclusive ergonomic package

- Best possible adjustment to body size
- Supports the body in every position
- For any work situation

## Neon

New generation workplace chair

- All the same adjustments and features as in ErgoPlus
- In addition changeable upholstery and flex strip for protection of the chair and its environment

## Flex standing rest

For best support in standing work and combined workplaces

- 360° rotation of the seat, easy height adjustment of foot ring
- Space saving
- Slip resistant seat

## Stools

- Optimal assistance in workshop and heavy duty applications
- Adjustment for seat height

## Saddle chairs

- Freedom of movement with ergonomic sitting position
- Adjustment for seat height and seat tilt

\* According to the DIN 68877, the seat height is measured from the floor to the center of the seat with a 141 lb load. The maximum load capacity of the chairs is 265 lbs.

## Accessories for chairs

Product	Description	Order No	Order No ESD
High glide set	Abrasion-resistant plastic glides have large surface area and offer superb level of stability. The glides can be retrofitted to all our chairs.	CGLIH	CGLIH-ESD
Soft castor set for hard floor	Dual-wheel safety castors are equipped with load-sensitive brakes, which means that the castors will brake when unloaded. As a standard, we supply soft castors for hard floors, but hard castors for soft floors needs to be ordered separately.	CSCAS	CSCAS-ESD
Hard castor set for soft floor		CHCAS	CHCAS-ESD
Soft Stop&Go castor set for hard floors	In case the high chair needs to be moved around the workplace, Stop&Go castors will provide the safe solution. These castors will brake as soon as they are loaded, but when not loaded, the chair is easy to move around.	CSTOP	CSTOP-ESD
3D armrests for Treston Ergo and Treston Plus	Adjustment of height and width with possibility to swivel.	ARE	
4D ESD armrests for Treston Ergo ESD and Treston Plus ESD	Adjustment of height, width and depth with possibility to swivel.		ARE-ESD
4D armrests for Neon	Adjustment of height, width and depth with possibility to swivel.	ARN	ARN-ESD
Chrome-plated foot ring	Foot ring can also be retrofitted to our lower chair models by attaching it to the chair column. Can be used on both ESD and non-ESD models. The height can be easily adjusted without any tools.	CRING	CRING

# Trolleys

## Freedom of mobility with trolleys

### Increased productivity with mobility

Work is not always confined to a single workstation and tools must be moved around accordingly. Lightweight trolleys are ideal for this situation, significantly increasing productivity up to 30%.

The trolleys provide extra work or storage space and can be used, for example, to transport various items, to store measuring units and keep a buffer stock on a production line.

Each task is different and requires dedicated tools. Due to their modularity and versatile accessory components, trolleys are easy to design and adapt to suit a multitude of users and applications.

# Universal trolley WTR

A good quality, versatile trolley, PC-station, measuring station or mobile storage trolley. Modern industrial design.

The standard trolley has 3 shelves (TS 605), size 25.59" x 20.87". Height adjustment of shelves is by allen-key. The vertical profiles are of aluminium. Frames are of epoxy powder coated steel: light grey RAL 7035. The worktops are of 1" laminated particle board. Four swivel castors (Ø 4.92") two of which have brakes, overall height of castor 5.55".

\*\* May be fitted with a choice of components, ordered separately.

# Multi trolley

Multi trolleys provide an ergonomic mobile workstation. Multi trolleys are available in three different widths: M20, M30 and M36. This means that all our module-sized accessories can be used with the trolleys.

The sturdy shelves can be height-adjusted and tilted. They are also equipped with borders and rubber mats, which keep the load in place.

Multi trolleys support heavy loads, but they are easy to move as well, making it simple to transport heavy equipment, such as measuring units. They are equipped with four swivel castors (Ø 3.94"), two of which have brakes.

In picture B: Side view of spools and reel racks. The capacity of one rack is 15 fixed compartments for 13" and 15" spools of 2.36" width.

# Mobile workstation MLC

The MLC 405 is a light weight mobile workstation designed to be ergonomic and provide excellent mobility. Accessories can be mounted on the Euro-rail surrounding the work surface. A laptop computer can be placed either on the work surface or under it. The rear recess allows you to conceal the laptop keyboard but leave the screen open and visible. An independent keyboard can be stored either on the work surface or on a keyboard tray (pictured, sold separately). Perforations around the sides and rear of the concealed compartment allow for cables to be connected to the laptop.

- The hinged work surface is made from low-pressure laminate.
- The frame consists of two interlocking aluminium profiles.
- A laptop can be housed on the worktop or stored underneath it to reveal only the screen.
- Cable connections are easily attached through holes around the storage compartment.
- Steel legs with four Ø4.92" casters, two of which are braked.

The mobile workstations equipped with a laptop enclosure are lockable.

# Packaging Trolleys

**Low Carton Trolley** includes 3 dividers that can be assembled sideways or longways. 4th divider is a push handle.

**High Carton Trolley** is very useful for packing cartons. Easily equipped with "M" dividers.

**Lower Carton Trolley** provides extra carton storage that can easily slide underneath a packing bench.

**Scale Trolley (SAP trolley with SDH)** holds scale equipment close to work space, and is easily moved as needed.

**Recycling material trolley (PRMT)** ideal for placing underneath or beside the packing bench. The bins are adjustable in angle for ease of use! The trolley comes with four swivel castors, two with brakes. Available in single and double version.

**Packing material trolley (PMT)** ideal for storing papers, envelopes and utilities such as tape underneath the workstation or bench. The shelves are adjustable in height and the metal dividers are adjustable in width by allen-key.

# Drawer Units

## Versatile drawer units

Since work is not always performed in the same place, we provide a comprehensive range of different drawer units for a variety of purposes. You can fix any drawer unit from the same series under a worktop or on a plinth, or equip them with castors to take along to your next workstation.

### Efficient storage and control

Our drawer units are great for storing tools and supplies. It is surprising how much time is spent finding tools and other items if they are not stored systematically. The versatile interior combinations of our drawer units guarantee that your supplies are always at hand and in good order.

### A comprehensive range of drawer units

We promise that you will find a drawer unit that meets your requirements in our comprehensive range. You can choose from several different heights and drawer and interior combinations. We have selected some combinations for this brochure. For more options, please contact: [sales@treston.com](mailto:sales@treston.com).

### Drawer units for light loads

These drawer units are designed for storing lightweight items, for example in a testing laboratory or in an office environment.

Drawer unit 30 and 35

Drawer unit 45

Drawer unit 75

These drawer units are fastened under a worktable to provide storage space. Choose from single drawer, two drawers or drawer cabinet. If additional drawers are needed, they can be easily attached to each other. The drawers can be locked to protect the contents.

Choose from two frame heights: 22.05" or 25.98", with base for a stand alone solution or with wheels for a trolley version. The drawer unit 45 can also be attached to the table frame/top. All the drawer units have central locking.

Choose from two frame heights: 22.05" or 25.98", with base for a stand alone solution or with wheels for a trolley version. All the drawer units have central locking.

## Three-level locking system

The majority of our drawer units and cabinets can be equipped with a three-level locking system. This allows both serializations of individual and identical locks. Contact your Treston representative for additional information. The locking services are always specified for the order.

### Serialization of individual locks

Each drawer or cabinet has an individual lock in a production unit, but a master key opens all the locks of the unit. The master keys can also be serialized and the third-level key opens all the drawers and cabinets of all the production units.

### Serialization of identical locks

Each team member needs only one key to access all the drawers and cabinets in a production unit. A master key opens all the drawers and cabinets of all the production units and can also be serialized.

# Drawer units 30 and 35

These drawer units are fastened under a workbench to provide storage space. Choose from single drawer, two drawers or drawer cabinet. If additional drawers are

needed, they can be easily attached to each other. The drawers can be locked to protect the contents.

**Drawer cabinet 35/47 is suitable for storing upright folders.**

**NEW: Drawer unit 30/22 is now available with a secure and up-to-date electronic code lock.**

This electronic locking system replaces keys with a numerical code. The code is easy to change when needed, for example, for a different user and thus this drawer unit is an excellent choice when high convenience and confidentiality are needed.

The locking system is operated with 2 x AAA batteries and is thus independent from an external power supply. Due to an automatic low power (sleep) mode, the batteries last long, and even when the battery power is low, the lock can still be opened 300 more times.

**Drawer unit 30/22 with electronic code lock, order number 720010-49.**

# Drawer unit 45

Centrally locked high quality steel drawer units for storage of tools and small components. Mounted under workbenches with brackets. Also available with casters as a trolley version. Drawer units are epoxy powder coated in grey, RAL 7035. Central locking. Full width drawer handle in anodised aluminium. Smooth and quiet telescopic ball-race runners with 100 % opening of the

drawers. Load-bearing capacity is 132 lbs per drawer. Our drawer units are suitable for use in EPAs. The mobile trolleys are available in both ESD and non-ESD versions. New drawer divider sets are available for functional and organized storage space

Choose the drawer unit according to your needs; with casters, base or no base.

Load capacity 330 lbs, 4 swivel casters (ø 3.93"), 2 with brakes. The trolley version comes with a rubber mat that stops items from sliding on the surface.

Base kit for 45 series drawers use part number 872030-49.

# Industrial cabinets

High-quality industrial cabinets are made of epoxy powder coated steel. The frames are painted with light grey RAL 7035 and doors either with blue RAL 5007 or with light grey RAL 7035. The cabinet frames have a lock with two keys, sturdy double leaf-doors and adjustable feet, and with a wide range of accessories it can be easily customized into versatile storage solutions, e.g. for tool storage or shelving. The industrial cabinets are pre-assembled.

**NEW:** All of the cabinets are now available with an ergonomically designed and functional turn handle mechanism with integrated key lock!

The cabinet can be opened and closed without keeping the key in lock. The key is needed only for locking the door. This locking method can be ordered by adding a T in the end of the product Order No (e.g. C30907000T).

New handle lock is also available to the industrial storage system and heavy storage system cabinets.

## Also ESD versions available!

All the industrial cabinets can be ordered as ESD versions by replacing the color code 07 (blue) with 49 (ESD light grey). This means that in addition to the cabinet frame, the doors will also be painted with light grey ESD paint, RAL 7035. Please remember to use only ESD bins and mats with these ESD industrial cabinets.

### Move with a pallet truck

The cabinet can be moved with a pallet truck or a forklift when the plinth front panel has been removed. Cabinets are equipped with adjustment screws.

**80/200-4 C30907004**

Includes 2 pcs steel shelves 80 , 854345-49.

### An extendable shelf for the cabinet

When the cabinet is used for storing folders, a separate extending shelf is a good idea. This shelf makes it easy to browse through the folders.

Please see our wide bin selection in Storage Systems brochure.

## Shelving cabinets

Industrial cabinets can be easily used as shelving cabinets by using the 15.75" deep shelf or stacking bins.

# Perforated panels

## Perforated panels are a part of a good organization

**Perforated panels are efficient dividers of space and, at the same time, practical storage facilities for tools and equipment. An industrial screen can be used as a sound-insulating space divider by equipping it with back panel elements with fireproof insulation.**

### Order and tidiness are appreciated

Order and tidiness cannot be achieved and maintained without there being a place for each tool. Perforated

panels and hooks offer a practical and versatile solution for storing tools and equipment. Perforated panel products are available for direct attachment to the wall or for attaching to upright profiles or tubes.

### Hooks also for heavy loads

The hooks can withstand loads of up to 44 lbs.

# Perforated Panels

The perforated back panels are fastened to the upright tubes with Treston benches. The size of the perforation is 9 x 9 mm, center to center 38 mm.

## 1. Perforated panels for workstations

# Perforated industrial screens

These industrial screens are modular, and they can be equipped with all M30 accessories. Industrial screens can be used as space dividers. They also provide noise insulation; the combinations available have perforated back panels on both sides and one side is insulated.

## Industrial screens

Name	Size W x H inches	Order No
Standard panel, T-feet	30.70 x 2.36 x 72.83	C52007101
Extension panel, T-foot	29.52 x 22.04 x 72.83	C52007102
Extension panel, L-foot	29.52 x 12.20 x 72.83	C52007103
Extension panel, I-foot	29.52 x 2.36 x 72.83	C52007104

Includes 6 perforated back panels, 3 pcs./side.

The standard panel includes two feet, the extension panel includes one foot.

## Parts

Name	Size W x H inches	Order No
T-foot	72.83	836516-49
L-foot	72.83	836532-49
I-foot	72.83	836597-49
Spacer bar	29.52	835838-49
Corner joint pair		847615-51
Perforated back panel M30	28.26 x .669 x 24.13	861512-07/-49
Perforated back panel M30, insulated*	28.26 x .669 x 24.13	861701-07/-49
Upper list	28.26 x 2.55	851907-07

The wall module requires two spacer bars.

\* The insulation material used is polyether foam.

All M30 accessories are suitable for the industrial screen.

**The color code is included in those product codes that are formed with numbers.**

It is either at the end, following the hyphen (e.g. 860 804-49), or in the middle (e.g. C 334-07 000).

## Industrial screen accessories

Name	Size W x D in	Max load lbs	Order No
Steel shelf M30	29.13" x 11.81"	110	836028-49
Steel shelf M30	29.13" x 15.75"	110	852770-49
Bin rail M30	29.21" x 3.94"	110	859151-49

**More accessories starting from page 48**

M30 accessories suit these industrial screens.

Steel shelf

Bin rail M30 with brackets and stacking bins.

# Tool Storage System

The original Treston tool storage system requires only 21.52 sq. ft. of floor space and provides 172.22 sq. ft. of storage space. There is no need to attach it to the floor, as it stands firmly on its own. There is a caster on the lower edge of the panels which makes them easy to move. The load capacity is 220 lbs./panel. A maximum of 10 panels can be attached to the tool storage system.

## Tool storage system

Name	W x D x H inches	Order No
Tool storage system, 4 panels	40.35 x 40.74 x 83.66	830518-07P
Additional panel	.59 x 37.36 x 77.79	830682-07P
Cabinet enclosure kit	40.35 x 40.74 x 83.66	14-839522-49

- 172 sq Ft of tool storage on 21 sq Ft of floor space!
- Up to 10 panels can be added to store even more tools.
- Adjustable distance between panels.
- Easy installation.
- Caster on the lower edge of the panels makes them easy to move.
- Free standing solution.
- Maximum total load 2200 lbs (load capacity 220 lbs per panel).

Cabinet style tool storage

# Wall Shelving

## Direct wall attachment

Attach the slotted upright profiles to the wall with screws, using wall anchors suitable for the wall material.

## Horizontal rail attachment

Attach the oval horizontal rail at an appropriate height. Take the wall's inner structure into account. Hang the upright profiles on the horizontal rail, using the hardware supplied. The horizontal rail makes it easy to install and modify the system.

### Oval horizontal rail

Name	Size inches	Order No

Pair of bracket, stainless steel	15.74	264	111024-55
Stainless steel shelf	35.43 x 11.81	76	111003-55
12 Stainless steel shelf	35.43 x 15.74	88	111004-55

### An additional support

Steel shelf load capacity can be doubled and wire shelf capacity quadrupled with an additional support for the steel shelf (009164-49).

# Material flow and packing solutions

# ModuLine material flow solution

Designing and assembling a manual material flow solution can be easy. A pioneer in ergonomic workplace designs, Treston, has launched a completely new concept: standardized material flow solution Treston ModuLine. The modular construction caters to varying needs, no matter what the function or layout needed.

## Material flow solution from modules

Well thought-out modules remove the need for a lengthy engineering process; ordering can be done online; transportation and storage is optimized in euro palettes; installation is fast with pre-assembled modules. You can get a working solution up & running in only 48 hours from the go-ahead. It's also simple and easy to modify or extend the line to adapt to changing needs.

If you are seeking to optimize your production line without automation, have a large product range but short cycles, or if you have outsourced engineering or maintenance, this is your safe and cost-efficient solution to improve both the production line and the bottom line. The module combinations fit most of the needs.

- Five pre-engineered aluminium modules provide multiple layout options.
- All major production lines can be realized: I-Line, L-Line, U-Line
- Carefully pre-chosen parts, sizes and heights
- Modules fit seamlessly together – safe choice
- Designing is easy with 3D Online configurator tool
- ESD protected
- Quick to assemble, within a day
- Easy to modify or extend the line to adapt to changing needs

Design your ModuLine easily with 3D configurator <http://3d.treston.us/>

# Pre-engineered modules mean cost-savings

- ① **ModuLine Stop table 39.37"**    ② **ModuLine Rotation table 39.37"**    ③ **ModuLine Extension 39.37"**  
 ④ **ModuLine Extension 19.69"**    ⑤ **ModuLine Curve 19.69" x 19.69"**    ⑥ **FIFO trolley**

Module type	Description	W x D x H inches	Order No
ModuLine Stop table 39.37"	Moduline workstation with stopping feature. Pallet is held with pop-up pads to avoid moving during the assemble time. Pop-up pads function with pressurized air.	39.37" x 25.59" x 87.01"	MOD510SESD
ModuLine Rotation table 39.37"	Moduline workstation with stopping / rotating feature. Pallet is held with pop-up pads to avoid moving during the assemble time. Pop-up pads function with pressurized air. Workstation has a rotate platform around pop-up pads.	39.37" x 25.59" x 87.01"	MOD510RESD
ModuLine Extension 39.37"	Moduline Extension module to build up a track between workstations.	Width 39.37"	MOD100EESD
ModuLine Extension 19.69"	Moduline Extension module to build up a track between workstations.	Width 19.69"	MOD50EESD
Moduline Curve	Moduline Curve module to build L- or U- shaped track. The curve keeps the direction of the pallet the same.	20.47" x 20.47"	MOD505CESD
FIFO trolley	FIFO (First In First Out) Trolley feeds components for Moduline workstations. Three adjustable flow shelves. Suitable for a wide variety of bin types, fits up to 150 Treston ESD bins. Max loading capacity 150 kg per trolley, 50 kg per shelf.	38.58" x 35.43" x 70.08"	MODFIFOESD

All modules are made of anodized aluminium frame and are ESD protected.

## Some examples of accessories

Product	Description	Dimensions mm	Order No
Moduline bin profile	Aluminium profile for Treston stacking and picking bins. Anodized aluminium profile. Suitable for Stop table 39.37" and Rotation table 39.37".	Width 36.22"	MODBP100ESD
Moduline steel shelf	ESD painted steel shelf. Suitable for Stop table 39.37" and Rotation table 39.37".	Width 36.22"	MODMS100ESD
Moduline pallet set	Includes 5 ESD pallets on top of which the mountable product is moved and worked on. A pallet can also function as a basis for a bigger pallet, max 15.75" x 15.75" in size. The bottom of the pallet is made out of robust steel. The surface is light grey and ESD protected.	11.81" x 11.81"	MODPAESD
Moduline floor fixing kit	Floor mounting kit. Includes 4 mounting brackets to mount Moduline modules to the floor. Suitable for Stop table, Rotation table and Extension 39.37".		MODFIXESD

# MultiLine assembly solutions

## Material flow to effective workstations

In the assembly industry, workstations are well planned and designed since they must function as well as possible. MultiLine is expressly designed as an accessory for Treston Group workspace solutions. Its underlying concept is simple: by connecting workstations to a transfer line you can achieve a more flexible and controllable material flow between workstations without sacrificing characteristics such as usability or ergonomics.

## Low investment costs

The MultiLine transfer system has two characteristics, due to which its investment costs remain low. Firstly, it is integrated with an existing system, complementing current processes and thereby avoiding the need for additional investments. Secondly, it is built using standard parts and design, which makes it easy to adapt to any situation and space. It can also be easily and quickly modified when the layout changes.

## Optimized for WIP

The core of WIP logic (work in process) comprises allocating a value to stored items between production phases. Money is wasted when half-ready products or components lie unused e.g. in a trolley used as a buffer. If MultiLine is used, only a small quantity of half-finished products lies waiting between production phases.

This problem is amplified if a mistake made in one phase remains unnoticed until a trolley full of defective components is brought to the next phase. With MultiLine both the cost per mistake and the number of mistakes are significantly minimised, because only a few faulty products can be produced before the mistake is noticed.

**Please ask for a quote on MultiLine solutions.**

### Trolley used as a buffer

### Manual transfer line

# FlexFlow flow-through shelving

FlexFlow flow-through shelving can be used as a standalone solution or integrated into a single workstation or assembly line, resulting in faster throughput, less work in process, higher productivity and managed inventories. Your assembly process as a whole will become simpler and more efficient.

FlexFlow is a flexible solution that allows easy addition and removal of components as the role of the workstation changes. FlexFlow can easily be customised to your application and operator using a wide range of accessories. When FlexFlow is equipped for, and adjusted to individual needs the whole production process benefits.

## FlexFlow module sizes

FlexFlow is based on module sizes in order to allow it to be easily integrated with other Treston workspace solutions and the MultiLine transfer system. The available sizes are M30 and M36. Both the width and the depth can be increased by combining standard modules that are M30, M36 and M53 in width, and 35.43" in depth.

Please ask for a quote on FlexFlow solutions.

# Treston Packing Bench TPB

is a well thought-out, safe and easy all-in-one choice

**Safe, economic and ergonomic all-in-one choice**

**Adapts and grows according to needs**

**50+ accessories and add-on products available**

**One flat pack contains all the basic equipment**

**Easy to buy, transport and assemble**

This packing table adapts and grows according to your needs. You don't need to know what your business will look like in two years' time, as you can add and remove accessories as you go. Start small and add from over 50 accessories based on your needs. TBB comes in one flat pack and is easy to assemble. Perfect packing table option for cost-conscious users.

Carefully selected materials, high-quality finishing, epoxy powdercoated steel parts RAL 7035. Laminate bench top, 1 inch low-pressure laminate.

**NOTE:** TPB packing bench can not be equipped with casters.

## Packing bench TPB

Size W x D x H inches	Max load lbs	Order No
35.43" x 59.06" x 25.59"-35.43"	660	TPB915

<b>10. Lower paper roll holder (extra)</b>	Epoxy powder-coated steel RAL7035. Simply hangs on horizontal bars of legs. Depth adjustable. Axle diameter 1 inch. Max roll width 64.96". Max load 88 lbs.	Axle Ø 1"	PRHROLL180
<b>11. Divider hoops set*</b>	Adjustable divider hoops for shelf of depth 12.2". 5 pcs per set.	Height 15.75"	PDH
<b>12. Aluminium bin rail</b>	For auxiliary steel shelf (ASSA4), stacking and picking bins. Max. load 88 lbs	55.87" x 1.38" x 2.95" 67.68" x 1.38" x 2.95"	BP150 BP180
<b>13. Extra high upright profiles</b>	If you need more space for uprights. 15.75" taller than standard one.	Height 57.87"	HKCP147
<b>14. Cable clip set</b>	5 pcs. The cable clip set will hold cables, etc. securely and neatly in place along the bench frame.		CC12

\*Included in the TPB packing bench; also available as an accessory.

# Treston Concept bench

accommodates the most demanding needs

**For all packaging needs, no need for compromises!**

**Wide variety of modules, options and variations**

**Largest number of accessories on the market**

**Sturdy, stable, high-quality**

You can choose from various table top material options, sizes and lengths; manual, handcrank or motor bench frames; racks for holding bins, cutters, rolls, and more; an endless number of modules and accessories including cutters, tape dispensers, PC stands and more.

Whatever the variation you need, you can build it from Concept and its modular elements. Modules fit together seamlessly, giving you an opportunity to create a complete packaging solution, perfectly matching your needs. Building packaging combinations from varying, yet standard modules makes it possible to create an ergonomically well-functioning packaging solution which is also robust and economic. No need for costly extra modifications or compromises!

## Concept bench frames (top sold separately)

Ø 3.94"	834734-00

## ④ Extra roll holder set

Extra roll holder set for packing material roll stands. Including brackets. Axle diameter 1 inch, zinc electroplated. Max load 88 lbs.

Module	Max roll width inches	Order No
M53	47.24"	859040-49P
M60	55.12"	859041-49P
M72	66.63"	859042-49P

# Cutters

## ① Cutter PPC

The round cutting knife will slice through paper and cardboard with ease. Can be affixed to the bench top or alternatively to the upright profiles with fixing brackets PPCFB.

Size W x D x H inches	Module	Cutting width inches	Order No
53.15" x 5.12" x 7.87"	M53	43.7"	PPC135
58.46" x 5.12" x 7.87"	M60	49.21"	PPC150
70.28" x 5.12" x 7.87"	M72	61.02"	PPC180

## ② Fixing brackets for cutter

In order to obtain an ergonomic position, the cutters can also be affixed to the upright profiles of all the workbenches using these fixing brackets. The fixing brackets make the cutter both height and tilt adjustable, tilt 30 degrees. Cutter is ordered separately.

Suitability	Order No
TPB/Concept upright profiles	PPCFB

## ③ Bracket pair for cutter

Cutter PPC can be fitted to the packing material roll stand with the bracket pair. Height adjustable. Cutter is ordered separately.

Suitability	Order No
Packing material roll stands	890511-49P

# Laboratory Furniture

**Tailored to suit your needs** We carefully study your laboratory and process methods to ensure that you get the best possible workspace solution for your laboratory environment and your employees' unique needs. The modular design enables you to integrate our workspaces fully with your current layout. You can easily modify them using our wide range of interchangeable accessories.

## Extensive Product Range

Each working environment has its own special requirements. We offer a wide range of standard products and solutions for numerous applications across a wide spectrum of environments. Our large variety of interchangeable accessories ensures that you get everything you need from one place.

For additional  
Laboratory  
solutions, please see  
Treston's Laboratory  
Environment Product  
Catalog.

Low height motorized work stations available to meet ADA guidelines.

**Concept™ Lab Benches** provide the lab user with the highest quality and most flexible lab system, adapting to the demanding needs and changing equipment in the lab of today and tomorrow.

**Cornerstone™ Lab Benches** are standard tables that are suitable for a broad range of laboratory tasks. Guaranteed for regular use with weights up to 1500 Lbs. This degree of strength is achieved by using a solid table structure.

**TL Advantage™ Island Lab Benches** not only supports storage requirements, it also defines and provides the actual worksurface. It provides easy access to the user's equipment and instruments from a one-sided or two-sided arrangement.

**Lab Carts** provide you with an ergonomic mobile solution for any lab environment. With modular and versatile accessory components you can move supplies safely from one lab or user to another.

**Lab Shelving** offers unique and user-friendly storage solutions. Treston shelving systems are built for maximum storage capability and ease of installation with high load capacities up to 660 lbs!

**Resolution Uprights** got its name from Treston's ability to find effective resolutions to any workspace problem. With the Resolution™ system, cable management will no longer be an issue in any lab environment!

## Customize your workspace with Treston Lab Furniture Accessories!

Treston laboratory furniture can be equipped with a number of accessories to create an ergonomic workspace. Accessories can accommodate the latest technology, and be used to enhance compatibility and user comfort.

## Discover our **Workshop product range**

Our workshop drawer cabinets, tool panels and workbenches are designed to withstand heavy loads and strenuous use in workshops, repair shops and industrial environments.

The long lifetime of our furniture guarantees productivity and a satisfied user. Our workshop furniture is also well known in teaching environments.

## Discover our **Storage Systems product range**

Our plastic storage drawers are durable and easy to clean, and can be customised into a complete storage system if necessary. Our product range also includes various stand and trolley solutions, for the more efficient use of storage space and easier movement of stored goods.

We also have storage furniture for EPAs. In addition, some of our storage solutions are based on reprocessed plastic.

## ESD Paint specifications

Treston workstations and related products are finished with a semi-conductive Epoxy/Polyester Powder. The surface resistance of the Treston proprietary paint formula is 1.0 - 10 MOhm depending on a film thickness and with 100 voltage. The paint comes up to the specifications of SP Method 2472. The resultant paint film has excellent mechanical properties, i.e. abrasion and impact resistance and elasticity. It is not scratched easily and withstands action by chemicals, greases and solvents. It has good anticorrosive properties.

Touch-up pen for grey paint surfaces For minor restoration of Treston workstations of colors 49 and 41. **14-99900723** •

# TP Workstations

- Treston® TP worktable frames consist of a pair of legs, rear case, and front rail.
- Treston® TP frames are available in 30" depth.
- TP frames are available in widths: 48", 60" and 72"
- Table frames can be easily equipped with any 12mm stem caster.

## Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Leg attachment parts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

	30 x 48	30 x 60	30 x 72
<b>A</b>	47.2"	59.1"	70.9"
<b>B</b>	27.6"	27.6"	27.6"
<b>C</b>	25.6-35.4"	25.6-35.4"	25.6-35.4"
<b>D</b>	24.4"	24.4"	24.4"
<b>E</b>	44.1"	56"	67.7"

## Basic™ Upright Frame/ MultiLine™ Leg Pair

- Basic™/MultiLine™ slotted upright frame consist of two upright legs with spacer bar to determine module size.
- Basic™/MultiLine™ slotted upright frame is 72.04" in overall height and the leg depth is 26.57" overall.
- Basic™/MultiLine™ slotted upright frame can support 220 lb load, evenly loaded.
- Frames are available in module widths: M20, M30, M36, M48, M53, M60, M72.
- Basic™/MultiLine™ slotted upright frame can be extended with extension modules; available sizes include M20, M30, M36, M48, M53, M60, M72. This extension module frame can also support 220 lb load, evenly loaded.
- Extension feet allow load to be extended for rear loads or for double-sided applications.
- Treston accessories can be adjusted in height in 1.1" increments.
- Basic™/MultiLine™ slotted upright frames can be easily equipped with any 12mm stem caster.

## Steel Thickness:

Steel used in the construction of the frames are 14 gauge CRS steel.

# Cornerstone™ Workstation

- Cornerstone™ worktable frame consists of one right and one left lower "H" leg. Upper horizontal front rail and upper horizontal rear structure for structural stability and slotted upright attachment.
- Cornerstone™ worktable frame can support 1500 lb load, evenly loaded.
- Depth of Cornerstone™ worktable frame is 23.62", 29.52" or 35.43"
- Frames are available in widths: 47.24", 59.05", 70.86".
- Height adjustment from 23.5" to 36.5" in 1 inch increments. Telescoping leg parts are set with through bolts.
- Table frames can be easily equipped with any 12mm stem casters.
- Slotted upright mounting brackets are included.

## Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Attachment parts for bolts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

# LMT Workstation

- LMT worktable frames consist of a pair of legs, rear case, and front rail, with a max weight capacity of 330 lbs.
- Depth of LMT table frame is 29.53"
- LMT frames are available in widths: 39.37", 47.24", 59.06" and 70.87"
- Table frames can be easily equipped with any 12mm stem caster.
- Height adjustment range of LMT frame is 25.39"-45.08". Adjustment is made with 2 linear actuators, using an up/down memory desk switch.
- The speed of the frame is .70" / sec without load
- The speed of the frame is .59" / sec with load
- The desk switch can be installed on the front, left or right side of frame.
- All units have soft-start and soft-stop circuitry.
- The table can be manually driven over the memory positions.

- Silent operation (45 db (A) DS/EN ISO 3746)
- Capable of operations in ambient temperature 41 to 104 degrees Fahrenheit

## Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Attachment parts for bolts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

E	29.5"	29.5"	29.5"	29.5"

# Concept™ Workstations

- Concept™ worktable frame consist of a pair of legs, rear case, and front rail.
- Depth of Concept™ table frame is 23.62", 29.5" or 35.43" with the use of depth kit.
- Concept™ frames are available in widths: 39.37", 47.24", 59.05", 70.86" and 78.74"
- Table frames can be easily equipped with any 12mm stem caster.

## Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Leg attachment parts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

## Concept™ Workstation - Manual

- Leg pair Concept™ 30 can support 1100 lb load, evenly loaded.
- Concept™ 30 can be equipped with tilting mechanism. The tilting frame is for width 59.05". Tilting frame is equipped with motor, which can tilt 85 lb load. Maximum tilting angle is 50 degrees.

- Height adjustment of Concept™ 30 frame is 26.62" - 44.34" with 1" table top and adjustment glide. Height adjustment is made by adjusting telescoping legs and tightening friction screws on the back and sides of the legs.

- Table frames can be easily equipped with any 12mm stem caster.

## Concept™ Workstation - Hand Crank

- Pair of legs of crank frame can support 440 lb dynamic load, and 1100 lb static load, evenly loaded.
- Frames are available in depths of 23.6", 29.5" and 35.43"
- Frames are available in widths of 39.4", 47.2", 59.1" and 71.1".
- Height adjustment of crank frame is 27.6"-41.4" with 1" table top.

- The crank handle can be installed on the left or right side of the frame. Standard table configuration is right hand crank.
- Height adjustment change one inch per each full rotation of the crank handle.
- The crank folds away under the frame when not in use.

## Concept™ Workstation - Motorized

- Leg pair of Concept™ motorized frame can support a static load of 1100 lbs, evenly loaded on a worktop and a dynamic load of 880 lbs, evenly loaded.
- Frames are available in depths of 23.62", 29.52" and 35.43".
- Frames are available in widths of 39.37", 47.24", 59.05", 70.86" and 78.74"
- Height adjustment range of Concept™ motorized frame is 27.80" - 43.55" with 1" table top and adjustment glides. Adjustment is made with 2 linear actuators, using an up/down memory desk switch.
- The speed of the frame is .70" / sec without load
- The speed of the frame is .59" / sec with load

- The desk switch can be installed on the front, left or right side of frame.
- The desk switch has multi position memory system to be able to set the frame to three customer based heights and up-down buttons for random settings.
- All units have soft-start and soft-stop circuitry.
- The table can be manually driven over the memory positions.
- Silent operation (45 db (A) DS/EN ISO 3746)
- Capable of operations in ambient temperature 41 to 104 degrees Fahrenheit

## TowerLine™ Workstation

- TL-worktable™ frame consist of leg pair, spacer bars, worksurface support assembly.
- TL™ leg pair can support 660 lb load, evenly loaded.
- Depth of TL™ table frame is 32.87" for single sided frame and 59.05" for double sided frame.
- Frames are available in widths: 49.88", 61.69" and 73.74".
- TL™ can be extended with extension table frames, widths 49.88", 61.69" and 73.74". These extension table frames can also support 660 lb load, evenly loaded.
- TL™ can be extended with a corner table frame, 32.87" x 32.87". This corner table frame can support 660 lb load, evenly loaded.

- Height adjustment of TL™ worksurface assembly is accomplished by mounting the worksurface assembly at the desired height along the length of the slotted vertical leg. Slots are 1" increments.

### Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Leg attachment components: 7 gauge CRS steel

# FlexFlow™ flow through shelving

- Flexflow shelving width - Available in standard bay size widths of M30, M36, M53. Flexflow frames may be extended by adding additional bay section to the desired overall width. Other sizes available upon request of M48, M60, and M72.
- FlexFlow shelving depth - Available in standard depth of 35.43" and may be extended by adding additional depth section to the desired overall depth.
- FlexFlow load capacity - Maximum load capacity of 1320 lbs. per bay section. Each roller top shelf load capacity of 440 lbs.

- Casters - Flexflow shelving may be made mobile by use of casters available in Locking and non-locking versions. Total load capacity on casters is reduced to the max load of the casters of 660 lbs.
- Shelf rollers - Available with ESD and non-ESD plastic wheels with steel axel. Other roller options available on request.
- Steel Thickness - Steel used in the construction of the slotted upright posts is 14 gauge CRS steel.O.D. is 1.18" x 2.36".Other shelving components use 14, 16 gauge CRS.

\*Dimensions D & E are inner dimensions of usable space.  
Dimensions A, B, & C are outer dimensions for overall frame.

## Slotted Upright Modules

- Upright module consist of a minimum of 2 uprights, which are installed with the correct spacing for the desired module size (see table).
- Upright modules can easily be extended to create double modules (3 uprights needed) or triple (4 upright needed) etc.
- Each upright can support loads equal to the maximum load limited by table frame or accessories in use.

- For accessories the height adjustment steps are 1.1".

### Steel Thickness:

Steel used in the construction of the upright is 14 gauge CRS steel.

## Trolleys

Multi trolley 2 frame

Multi trolley 1 frame

## Ergo Trolleys

- Frame of the Ergo trolley is 29.5" wide and 19.7" deep.
- Height adjustment of Ergo trolley frame is 24.6" – 35.4" without table top. Adjustment is made by adjusting telescoping leg to desired height and tightening the friction bolts.
- Trolley can be equipped with optional steel bottom shelf, which can support load 110 lb and the table top can support load 220 lb, so total load capacity is 330 lb.
- Two of the 4 casters have brakes.
- Height of casters are 3.94".

### Steel Thickness:

Steel used in the construction of the products are 14, 16 and 20 gauge CRS steel

# Shelves

## Adjustable Shelves

- Shelves are available in widths of M20 (19.7"), M30 (29.5") and M36 (35.4").
- Loading capacity for standard adjustable shelves is 220 lbs.
- Loading capacity for the depth adjustable shelf is 110 lbs.
- Shelves are available in depths of 19.9" and 25.6".
- Shelves can be adjusted as horizontal or tilted (+/- 25 degree).
- Shelves have chamfered edges in the front and back
- Shelves can be mounted at different depths: front justified, in the middle or rear justified.

- Depth adjustment allows for 9" of adjustment on 20" deep shelves and 14.5" on 26" deep shelves.
- Height adjustment is in 1.1" intervals.
- All shelves have a mat: ESD-mat or rubber-mat for a non-slip shelf surface.

# General Terms

Freight is FOB shipping point, Canton, GA. Freight will be pre-paid and added to the invoice or freight collect according to your written instructions. We will coordinate shipments with your representatives. If the job site is not ready to accept shipments at the time scheduled, we will not be responsible for moving material in or out of storage or other job site locations and any costs incurred. **"FOB shipping point"** indicates the buyer pays shipping cost to the end user, and takes responsibility for the goods when the goods leave the Treston's premises or the premises of the Treston subcontractor when drop shipping direct from the Treston subcontractor to the end user.

Worksurfaces – While we will always try to ship all products together, due to delivery situations, and order size worksurfaces may need to be shipped directly from our plant in Bow, NH. A confirmation of this decision will be sent to distributor at time the order is placed.

**All material is shipped knocked-down unless otherwise noted.** Assembly and installation is not included unless otherwise noted on the order.

Receipt of goods must be inspected and inventoried. Any shortage must be reported in writing within **48 hours**. Treston's freight terms are FOB Canton, GA. Any freight damage should be noted on the freight bill at the time of receipt. Claims should be reported to the freight company directly as soon as possible. Treston will assist in the claims process but cannot file the claims.

Return policy; All returned goods require a RMA number (Return Merchandise Authorization) issued by Treston, Inc. prior to the return of any goods. **All Requests for return authorization must be within 60 days of original invoice.** All returns should be packaged so that it is returned in re-sellable condition; returned freight prepaid. Upon receipt and inspection of product, Treston, inc. will issue an 80% credit against applicable invoice if product is deemed re-sellable. Custom or non-standard products may not be returned.

Authorization of partial shipments requires written approval from the distributor and acceptance by Treston, Inc.

**Terms are NET 30 days from the date of invoice.**

Warranty: Steel construction and weldments, (5) five years from date of shipment. Mechanical cranks, fixtures and devices, (1) one year from date of shipment. Electrical motors, fixtures, and devices, (1) one year from date of shipment. All in accordance with established Treston warranty statements.

All products are Treston gray (RAL 7035) in color unless otherwise noted. Special paint colors may incur an additional cost.

All items noted with ESD properties are guaranteed to meet ESD requirements specified in the IEC-61340-5-1 standard. Connection, grounding, any local requirements and verification of same is the responsibility of the end user.

Change orders to the items listed above are to be detailed in separate correspondence including any modifications in price.

Treston will not accept any contract or agreement that contains any penalties or liquidated or actual damages.

**All orders are subject to credit approval by Treston, Inc.**

Any order under our \$100.00 minimum will be subject to a \$25.00 handling fee. Spare parts excluded.

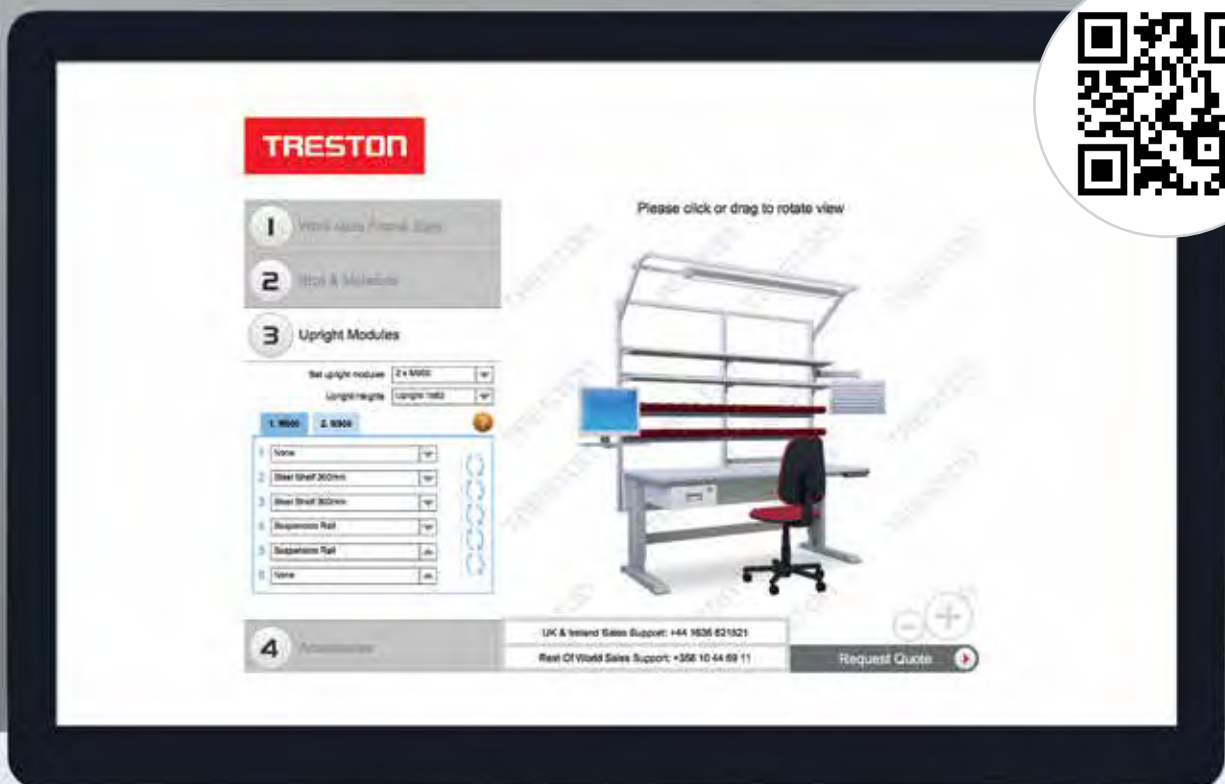

## Packaging

Treston takes pride in protecting our shipments from damage. Shipments are carefully packed to ensure shipments are received damage-free. Upon shipping, "DO NOT STACK" cones are placed on top of the boxes. A photograph of the shipment is placed on the outside of the package to display the state of the shipment as it is shipped. The photograph provides photo proof to the receiver as to the state of the shipment upon departure from origin.
