

A trusted workstation partner

For mission-critical production environments

Secure, certified and ergonomic workstation solutions for defense and high-reliability manufacturing

Treston – Trusted partner of the defense industry

For defense sector organizations, security and reliability are non negotiable. Production environments must protect sensitive electronics, support operators during demanding work, and remain dependable for decades. At the same time, defense manufacturers require suppliers whose stability, production location and supply chain can be trusted over decades.

For more than half a century, Treston has delivered industrial workspace solutions used by manufacturers of mission-critical technologies. Today, Treston supports U.S. defense and aerospace manufacturers with ESD-safe, ergonomic workstation systems designed to improve quality, reliability, and operator performance.

Established in 1969, Treston has built its reputation on certified safety, modular workstation systems and long lifecycle availability. All this supports defense sector today and in the future.

Strategically secure partner

Treston workstations for the U.S. market are manufactured in Arizona, providing a secure, transparent, and resilient supply chain. Domestic manufacturing helps ensure dependable availability, shorter lead times, and the confidence that comes from working with a trusted U.S. production partner.

Quality management at the core

Our facilities operate under strict quality management systems, according to certified processes, providing the assurance that every product is built to extremely high standards. Treston's operations follow ISO certified processes, ensuring consistent excellence in everything we design and manufacture, as well as Lean-philosophy ensuring continuous improvement on every aspect.

Local support across North America

With a dedicated team supporting customers across the United States and North America, Treston provides expert guidance, responsive service, installation support, and long-term partnership to defense manufacturers who depend on reliable workspace solutions.

USA manufacturing with nationwide support | Treston combines American production and regional expertise, with a factory in Arizona, and a distribution center in Georgia, enabling fast delivery and responsive service across the country. Backed by a strong international presence, customers benefit from **world-class quality and local support.**

Why defense customers choose Treston

- **Proven, stable partner.** Established in 1969 and trusted by industrial and defense manufacturers world-wide, choosing Treston means long term reliable partnership.
- **American manufacturing.** Having production in the US, ensures a secure and transparent supply chain, dependable lead times, and the confidence that comes from working with a trusted domestic manufacturer.
- **Certified quality.** Treston operates under ISO-certified quality and environmental management standards and offers ESD and cleanroom certificates. Our products are also backed with 10 year warranty. Our customers don't need to worry about compatibility; they can focus on their performance.
- **Long-term solutions.** Modularity, durable materials, and long term availability of Treston's high-quality products ensure our solutions last for decades. Solutions grow and scale according to our customers' needs contributing to high life-cycle value.
- **Custom-made solutions.** When standard in-stock solutions are not enough, we can quickly, cost-efficiently, and securely design and manufacture fit-for-purpose solutions for customers requirements.
- **Experience.** Treston's ESD and ergonomics knowledge combined with experience from defense sector installations helps us guide our customers to select the viable setups for their needs.
- **Local presence.** Treston provides sales, engineering support, and project guidance throughout the United States and North America, helping customers from planning and specification through installation.
- **Long-term value.** Treston workstations are designed for decades of use. Durable materials, modular upgrades and spare part availability reduce replacement needs, equalling to low total cost of ownership.

Our manufacturing site in Arizona ensures short, secure and transparent supply chain, and dependable lead times.

ESD-safe configurable **workstation solutions**

Treston workstations are designed to protect sensitive electronics and support demanding industrial workflows.

Inherently ESD-safe design - Compliant and certified

- Compliant with international ESD standards, ANSI S20.20, IEC 61340-5-1, and IEC61340-6-1.
- Designed from the beginning for use in ESD environments – special conductivity-enabled design & ESD Proof painting.

Ergonomic performance

- Height-adjustability, modularity and accessories enhance operator comfort and safety during long shifts and improve operator productivity.
- Innovative conductive ESD paint reduces the need for separate grounding, enabling cleaner and safer workspace.

Durable construction

- Industrial-grade materials ensure reliability in demanding environments.
- 10-year warranty - A reflection of the long lifecycle and durability of Treston solutions.

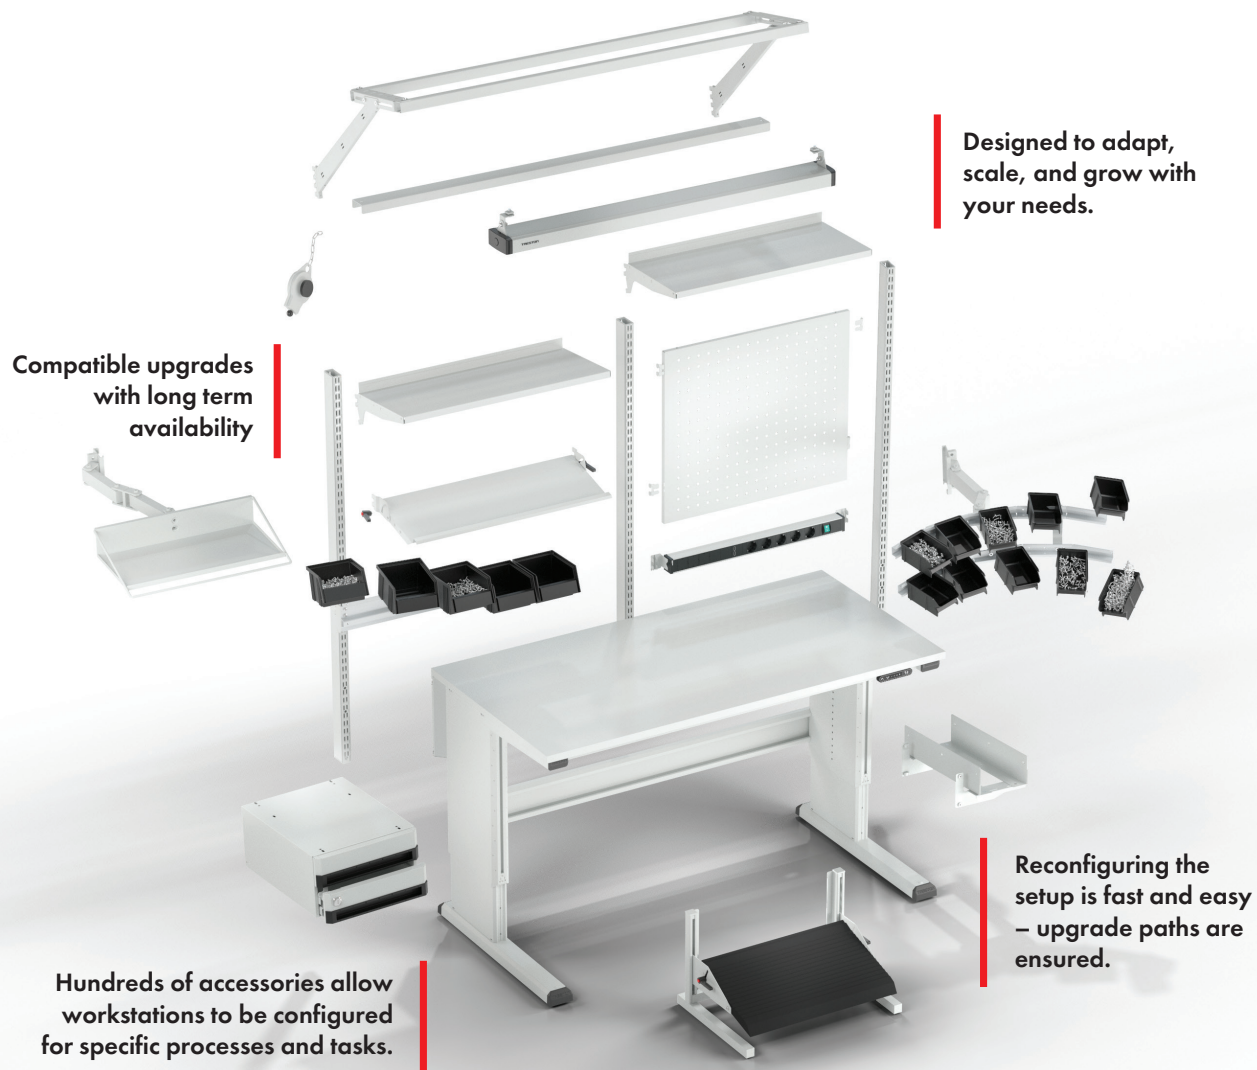

Comprehensive ESD product range

- Workbenches, storage systems, carts, drawer units, chairs, lights and over 300 workstation accessories.
- Battery-powered, mobile workstation solutions.
- Custom-built solutions ensuring each workspace supports the exact needs of the operation.

“ESD proof, modular and ergonomic solutions reduce your operational risks in mission critical work”

Modular workstation systems ensuring **upgrades are easy**

Solutions that evolve with your operations

Defense manufacturing environments change as technologies evolve. Treston workstation systems are designed to adapt over time.

Upgrade paths

Modular systems allow workstations to be expanded or reconfigured without replacing entire installations.

Long lifecycle availability

Products remain available for extended periods, supporting long-term programs.

Customization capability

Treston also develops tailored solutions for specialized production environments.

A strategic partner for defense projects across the United States

From concept design to full deployment — Treston supports every phase — today and in the future.

Treston supports customers from workstation configuration to full production environment planning.

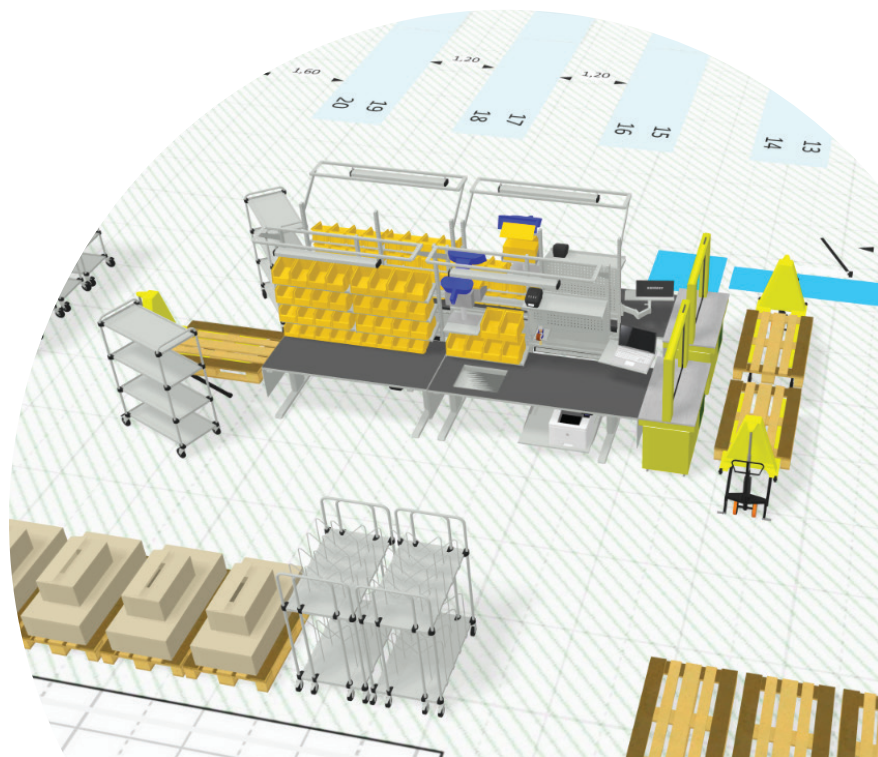

Our experts work with you to design workstation solutions that support your processes today and remain adaptable for the future.

Project sales roadmap

Treston collaborates with engineering, facilities, maintenance, EH&S, and procurement teams throughout planning and deployment:

- CAD files
- configuration guidance
- accessory selection
- modular scalable solutions
- custom-made solutions
- installation support

Work environment solutions built for every stage of the defense manufacturing

Defense related electronics and precision systems demand environments where reliability, safety and traceability are guaranteed. Production teams must protect sensitive components, maintain strict quality standards and operate efficiently even during long shifts. Workstations need to be robust, configurable and certified – designed for handling sensitive electronics.

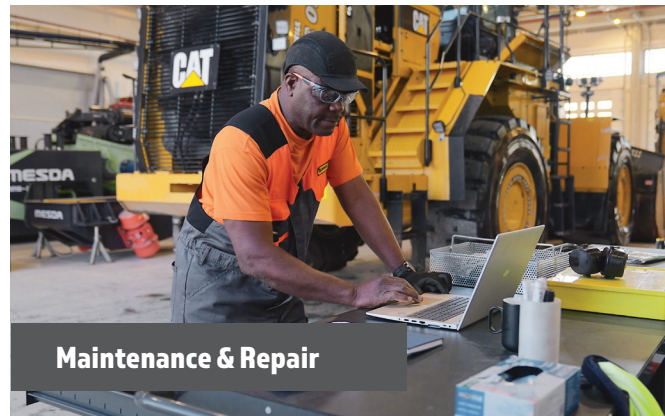

Treston solutions support these environments with proven ESD protection, ergonomic design and modular configurations that adapt to changing needs.

Trusted by manufacturers of:

- military systems
- avionics electronics
- satellite technologies
- radar systems

Certified to meet global standards for **demanding environments**

ESD certification IEC 61340-5-1

- **ESD workstations** (Concept Ergo electric and allen key adjustable workstations, QuatreX, TED, and TP workstations)
- **ESD chairs** (Integra, Doral, Everlast)
- **ESD carts** (Multi Industrial carts, SAP carts)
- **ESD storage bins** and bin cabinets

Treston workstations and furniture have been the benchmark in high-quality ESD furniture for over 40 years. Our ESD Proof products are designed to be inherently ESD safe, and they are ESD certified and compliant with **IEC 61340-5-1, IEC61340-6-1, and ANSI S20.20** standards.

Cleanroom suitability ISO 14644-1 class 7

- **ESD workstations** (Concept Ergo electric adjustable ESD workstations, QuatreX ESD workstations, TED ESD workstations)
- **ESD chairs** (Integra, Doral, Everlast)
- **ESD storage bins**

ESD Proof by Design™

With Treston solutions you can rest assured you create workspaces where safety, comfort, and performance go hand in hand. Treston workstations and furniture have been the benchmark in high-quality ESD furniture for over 40 years. ESD protection is built into the very foundation of our ESD workstation solutions.
