## For a Better Work Environment

# DEDICATED TO HUMAN WORKSPACE

## Treston is among the world's leading suppliers of industrial furniture and workstations.

Our workstation design and implementation process always begins with the person performing the work. In this way, we pay close attention to ergonomics, functionality and efficiency.

The four cornerstones of our operations are customer focus, reliability, high quality and continuity. We listen to your needs and reliably deliver high quality and durable solutions, which last from one generation to the next, thanks to our optimal design.

Our own sales network and retailers dedicated to our products provide worldwide assistance and service in support of Treston products.

# Industrial furniture and workstations for different working environments

Treston's product range is divided into three categories, a separate catalog is available for each category. Please contact our agents or email us at: infousa@treston.com to get your own copy.

### Distinctive workshops

Our workshop drawer cabinets, tool panels and workbenches are designed to withstand heavy loads and strenuous use in workshops, repair shops and industrial environments.

The long lifetime of our furniture guarantees productivity and a satisfied user. Our workshop furniture is also well known in teaching environments.

### **Ergonomic workstations**

The seamless efficiency of material flow is emphasized in assembly workstations.

Process changes in production or operations require reconfigurable workstations that take account of individual ergonomic requirements. Our modular product solutions allow you to react to new situations and the resulting needs in an agile manner, enabling smooth, continuous operations. Thanks to our extensive selection of accessories, we are able to satisfy even the most challenging requirements.

Treston's design and years of experience enable us to customize each solution to best suit its purpose. For the needs of the electronics industry, we make ESD-protected workstations, suitable for furnishing EPAs. These workstations are also highly suitable for precision mechanics and mechanical engineering.

### Swift in-house logistics

Treston storage furniture encompasses both ease of use and design. Our selection provides solutions to a surprisingly broad range of storage challenges, regardless of the users and sector.

Our plastic storage drawers are durable and easy to clean, and can be customized into a complete storage system if necessary. Our product range also includes various stand and cart solutions, for the more efficient use of storage space and easier movement of stored goods.

We also have storage furniture for environments that require ESD protection. In addition, some of our storage solutions are molded from recycled plastic.

Packaging and shipping departments are often found at the end of production processes. Their logistic efficiency can be easily improved through sensible workstation design.

A great deal of manual labor and quality assurance are typical of the packaging stage, in both individual stations and line solutions. Our solution for the needs of these segments often builds on the idea of "more for less".

When accessories are located and positioned according to LEAN principles, you can significantly speed up throughput and reduce work strain. Cutters, pens, knives, trash bins and displays can be positioned in a way that provides the user with the best possible ergonomics, while also ensuring a free and uncluttered workspace.

# Workstations for every need

Optimizing workstation functionality may prove difficult without well chosen accessories that increase usability. When a workstation is well planned and well equipped, workflow becomes easier and more efficient, improving ergonomics and making it easier to keep tools in place.

### Modular means adaptable

Our world keeps changing at an ever-increasing pace. Until recently, products could be manufactured the same way for decades, but now we must be prepared to make changes to our work practices at a much faster rate. In order to revise the production process to meet new requirements, an extremely flexible and adaptable workstation system is essential. Our system is designed particularly with this in mind. The same basic units, equipped with accessories that meet your needs, offer a wide range of applications.

# Customized for your application and your operator

The purpose of a workstation determines its basic requirements and accessories. The needs and requirements may change considerably from one employee to another, but we understand that no two people are alike. When a workstation is equipped for and adjusted to an individual's needs, each phase of the production process can be completed without delay, with accuracy and with maximum comfort.

Treston offers a wide range of ergonomic workstations to choose from, from those that can be delivered quickly to those that provide versatile options to meet any need.

# Ergonomics in our workstations

Costs associated with health and safety problems are an ever increasing concern to all industries. This concern drives industries to seek solutions to provide a healthy, safe and productive working environment. **Designing a workplace with ergonomics in mind improves the employees' wellbeing which in turn improves productivity.** 

The modular design of Treston workstations enables proper ergonomics. With a wide range of accessories and adjustments we can provide customers with a customized solution using standard components. **Modularity and accessories are individually adjustable according to the task and operator requirements.** The aim is to create an uncluttered workstation and utilise the available workspace as efficiently as possible.

Treston's workstations and accessories can be adjusted for operators of different heights working with left or right hand. Correctly adjusted workstations decrease stress in the muscles and enable productive work throughout the shift.

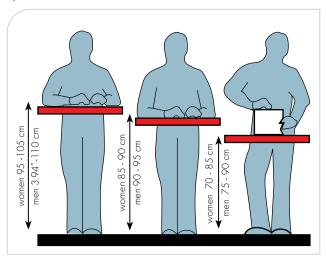

Please do remember that ergonomy is not only adjusting your chair. Real ergonomy has to do with proper lighting, noise absorption, body movements and air quality. More information about lighting ergonomics on page 34.

### Seated or standing work?

The choice of a seated or standing working position is dependent upon the task to be executed. The height of the work surface is determined by such factors as size and weight of the part, precision requirement, assembly process, repetitiveness etc.

Height adjustability is especially useful when the size of the products being handled varies or when several people use the same workstation.

When designing the work space for a seated operation leg space requirements must be considered. The recommended space should be at least 80 cm wide and 90 cm deep at floor level. For standing work, the required space is much smaller.

Standing work

# Our standards comply with the highest certification requirements

Quality certification

ISO 9001 : 2008

Environmental Management System certification

ISO 14001 : 2004 + Cor 1 : 2009 Packaging treatment following to EU directives.

ESD-approval certification

Our ESD products fulfill the basic requirements of IEC 61340-5-1.

GS certification for lighting and TP workbench

Cleanroom Suitability of Treston Concept Motorized Workstations

ISO 14644-1, class 7

Cleanroom Suitability of Chair Treston Ergo C20PU-ESD

ISO 14644-1, class 7

ESD certification

Treston Concept workstations fulfill the basic requirements of IEC 61340-5-1

To obtain a copy of our certificates, please contact infousa@tresib.com.

The guarantee period for products manufactured by Treston is 5 years from the date of delivery; this excludes workbench tops, trade parts, electronic components, custom made articles and moving parts, for which there is a guarantee period of 2 years.

The working environment can also look good and be inspirational. By choosing the colors of your equipment to match your corporate colous, you can reinforce your corporate image while creating a pleasant working

Doors, drawers and perforated panels all come in various colors. The combination of different colors creates an interesting effect. Colors can also act as codes or identifiers.

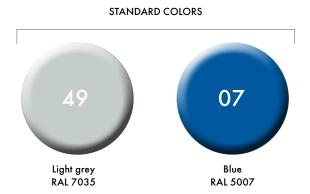

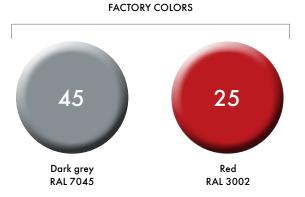

# Color codes

Workbench, cabinet, shelving, drawer units and cart frames are all light grey RAL 7035. Outside of the standard color range, additional colors are available on request. Please contact our agents or email us at: infousa@treston.com.

	Color code	RAL code	Doors	Drawers	Perforated panels and back panels
Light grey	49* & 41**	RAL 7035 (ESD)	STD	A/STD	A/STD
Blue	07	RAL 5007	STD	A/STD	STD
Dark grey	45	RAL 7045	А	А	А
Red	25	RAL 3002	Α	Α	Α
STD = Standard factory color, normal warehouse delivery, listed price.					
A = Factory color, not stocked, listed price.					

<sup>\*\*</sup>The frames of the products ordered with the color code 41 (RAL 7035) are powder coated with a light grey ESD color, but there are non-ESD parts in these products, such as shelves, rubber mats or casters.

The color code is included in those product codes that are formed with numbers.

It is either at the end, following the hyphen (e.g. 860 804 49), or in the middle (e.g. C 334 07000).

Printed colors do not give a fully accurate representation of painted colors. Please ask our agent about various samples.

shops product catalog

<sup>\*</sup> The products ordered with the color code 49 (RAL 7035) is entirely ESD protected. Please note the ESD protection feature of this color will result in a slightly darker shade of color than the given RAL code.

# Workbenches and accessories

'Workshop' benches are designed for the most demanding use and environments. Mechanical workshops, garages and heavy industry are environments where chemicals, heavy loads, and strenuous use necessitate robustness. These workbenches are very durable

and withstand the toughest conditions. There is a wide range of accessories available.

The Workshop bench is guaranteed for regular use with loads up to 1650 lbs.

- Worktop designed for very heavy loads, load capacity up to 1650 lbs.
- Very stable on uneven surfaces due to adjustable legs.
- Can be bolted to floor for more stability.
- You can build your personal workstation with our wide range of accessories.

### A drawer unit can serve as a leg

Workshop workbenches can be easily extended by using a drawer frame or a leg as a common support for two workbenches.

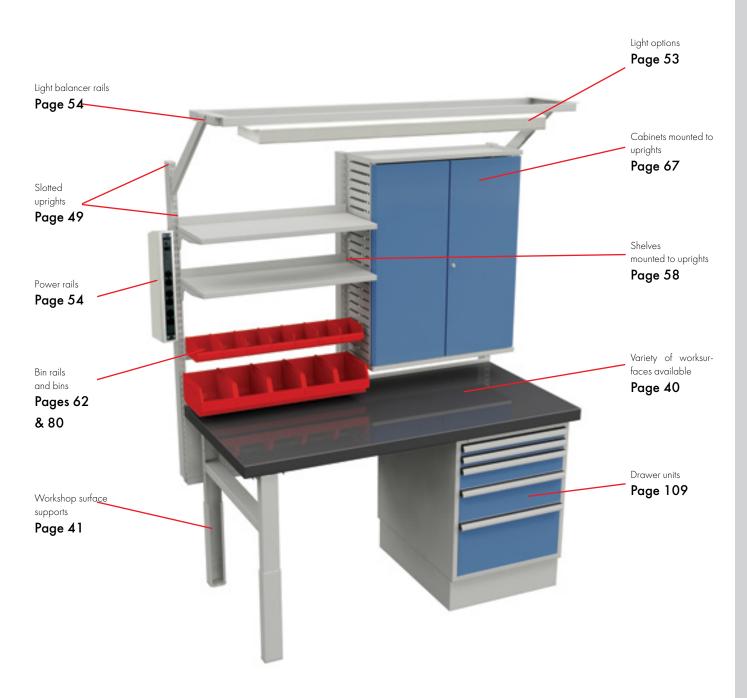

### This example includes

Qty	Name	Size in	Order No
2	Fixed height leg	31.49	836303-49
2	Steel worksurface	59.05 x 29.52	836721-74
1	Drawer unit 55/66-1	21.65 x 28.14 x 31.49	61207201

# Designing a Workshop workstation

**Workshop workstations** are available in several sizes. Accessories can be added to optimize functionality and increase usability. See pages 48-87 for accessories.

### Design your own workstation

You can design your own workstation using the available components with the 3D configurator at  $\frac{1}{2} \frac{1}{2} \frac{1}{$ 

### Workshop™ Workstation

Order No C14-1304127

# Workshop Worksurfaces

- Select the appropriate bench top.
- Select a support for both ends of the bench top: adjustable or fixed leg or a drawer unit.
- Use a spacer bar to stabilize the bench.
- An accessory frame can be used instead of a spacer bar if upright tubes are used.
- Equip with accessories starting from page 24.

# Workshop steel top

- Steel top 1/16 inch
- Painted dark-grey surface
- Blue plastic end edges
- Plywood and chipboard core
- Threaded bushings for attaching legs and drawer units
- 1/8 inch steel top available upon request
- Overall thickness of 1.96"

# Workshop top with steel edges

- Plastic top
- Grey plastic surface
- Galvanized steel moulding in the front edge
- Plywood and chipboard core
- Threaded bushings for attaching legs and drawer units
- Overall thickness of 1.96"

### Workshop Shop Top

- Industrial grade particle board surface with medium-density fiberboard (MDF) or lumber core
- Lacquer finish
- Overall thickness of 1 1/2", 3/8" radius top and bottom front edges

# Workshop maple top

- Maple hardwood surface with chanfered edges
- Thickness of 1 3/4 inches.

### Workshop bench tops

Lower shelf for fixed leg for table 80	73.62 x 29.51	220	92449015
Lower shelf for adjustable leg for table 88	83.46 x 29.51	220	92449016
Lower shelf for fixed leg for table 88	83.46 x 29.51	220	92449018

See pages 48-87 for our wide range of workstation accessories.

### Structure of the bench top

For us, the bench top is an important part of a bench's structure. For example, the Workshop bench top is designed for very heavy loads. Because of the bench top's structure, the bench is very sturdy, even with the highest loads. The feet and the drawers are attached to the threaded bushings in the bench tops.

Cornerstone® worktables are standard tables that are suitable for a broad range of tasks, including but not limited to: testing, packing, repairing, inspecting. The Cornerstone® table is rated for regular use with weights up to 2000 Lbs. This degree of strength is achieved by using a solid table structure. The slotted upright frame allows for the use of different accessories.

### Manual height adjustment

The height of our Cornerstone® range can be adjusted from 24.75 to 37.64 inches, in 1 inch increments, making these tables suitable for work while sitting or standing.

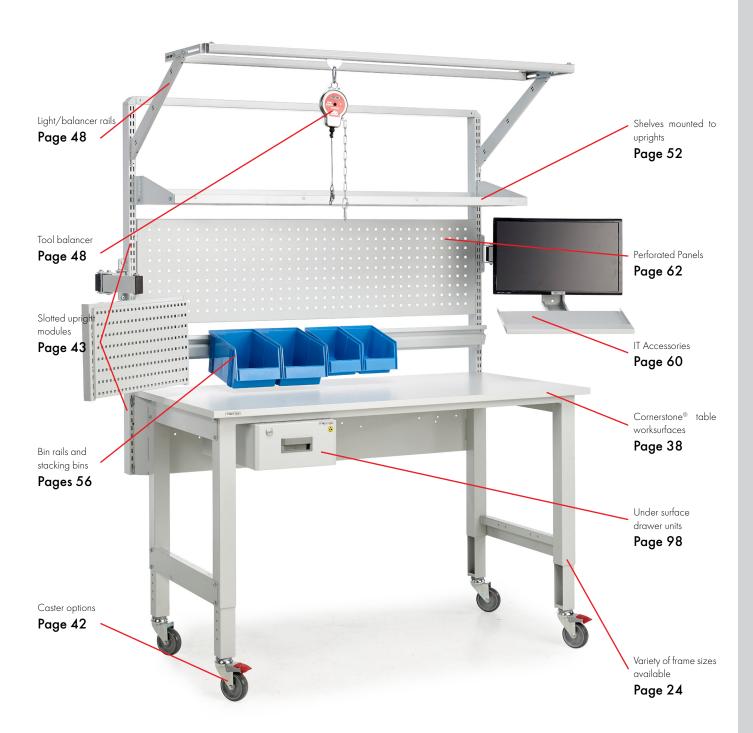

- 4-legged steel structure
- High load capacity for even the toughest environments
- Easily equipped with accessories

- = products in stock with quick shipping time (1-2 weeks)
- = products that are not stocked but have shorter delivery times (3-4 weeks)

# Designing Cornerstone® workstations

Divider set - 4 pcs 18 11" x 12 4"	IDH

The classically designed TP workbench is the ideal basic bench, the simplest and the most cost-effective option in our range of workbenches. TP workbenches are standard benches that are suitable for a broad range of tasks and environments when fitted with accessories: testing, packing, repair, inspection. TP bench is rated for loads up to 660 lbs.

Designed for use in today's production and assembly environments, this definitive modular system, developed over more than 35 years, provides a high quality working environment. Customize your workstation to your own requirements.

### Stepless height adjustment

The height of workbenches in our TP range can be steplessly adjusted from 25.6" to 35.4", which makes these benches suitable for work while sitting or standing.

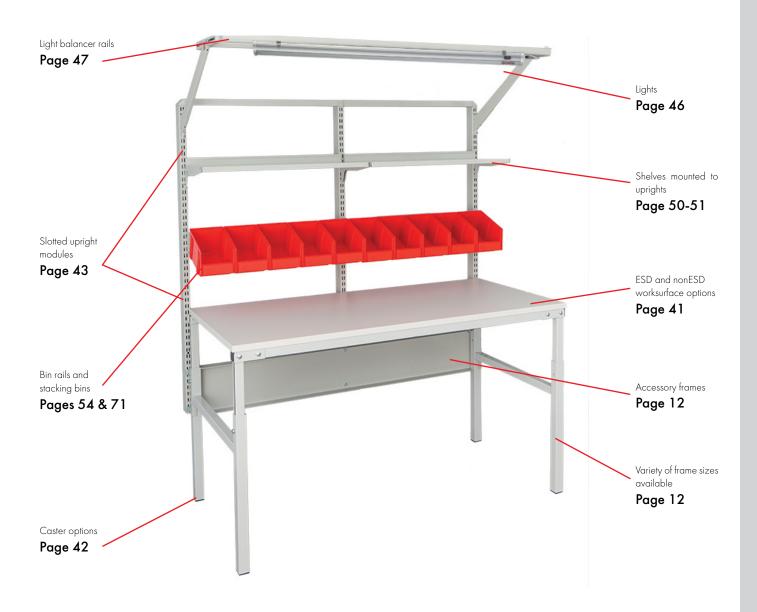

- Steel structure
- A cost-effective work bench option
- Easy to equip with a variety of accessories

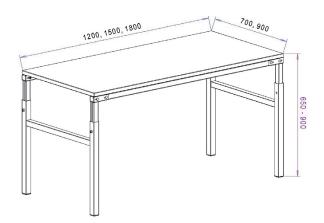

# Designing TP workstations

**TP workstations** are available in several sizes, with ESD and nonESD options. Uprights and accessories can be added to optimize functionality and increase usability. See pages 42-73 for accessories.

# Accessories

The modular (M) size refers to the distance between two upright tubes from the middle of the tube. The modular size is used to find the appropriate accessories.

**Upright tubes are the basic element for accessorising our industrial furnishings.** Accessories are attached to TP and Workshop benches with the aid of upright tubes or a pre-assembled, upright tube module. The module includes upright tubes, horizontal tube/tubes, corner bracket pair and straight bracket (if module has more than one horizontal tube). The upright tubes or the upright tube module are attached to the back of the TP bench with accessory frame (ordered separately).

### Upright tubes

# Balancer Rails and Accessories

Tool balancer rails and sliding hooks facilitate the use of heavy equipment. A tool balancer is attached either to the light/balancer rail, or on a balancer arm attached directly to the upright tube.

### Light/balancer rail

Sliding door cabinet

File cabinet with two shelves

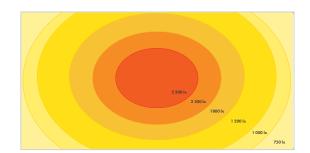

PC/folder box

Lighting is a vital part of ergonomic workspaces in industrial environments. Light allows people to see and perform tasks better as well as affecting their personal wellbeing and health.

# Individually adjustable, natural workstation lighting means more productivity

Investing in individually controllable task lighting on workstations benefits both the employees and the employer. Employees feel more motivated as they can adjust brightness to best suit themselves and the task at hand. This can lead to increased productivity, reduced errors and less absence, which normally affect the company's profitability.

Graph of light Illuminance

### Lighting standard sets the expectations

When designing workstations and their lighting, we observe the recommendations of the EN 124641 standard on indoor workplace lighting. The illuminance levels set by standards are average values, but going beyond those is often reasonable. It is especially beneficial to increase the high-quality lighting for employees over 45 years old.

### Optical ergonomics need attention

Optical ergonomics require the viewed object to be at a suitable distance and location, in order to maintain an acceptable amount of eye movement, ensuring that the details can be seen without problems. Also, adequate and glare-free lighting is important. When these conditions apply and the working position is well adjusted, saving time and money due to fewer absences and decreased stress can be expected.

# Benefits of proper adjustable lighting in industrial environments include

- Increased productivity
- Reduced number of errors
- Decreased absenteeism
- Increased well-being of the employees

# **LED Lighting**

Treston's dual intensity LED light fixtures feature a High/Low/Off switch that allows the user to control the amount of light used. They can easily be attached to light balancer rails, shelves, and other surfaces. Optional magnetic mounting bracket for attaching the light fixture to a metal shelf allows for greater functionality and maneuverability. A pipe mounting bracket has also been introduced for attachment to benches from other manufacturers. LED light fixtures are a great addition to any workstation or workplace, where energy efficiency, durability, and longevity are important factors. LEDs boast a long life span, 10x longer than traditional florescent lamps, and use up to 90% less power than traditional lighting. Treston LED lights have a lifespan of up to 100,000 hours (11 1/2 years powered 24 hrs/day).

### **Features**

- High/Low/Off switch
- Light balancer rail hardware and power cord included
- Easy attachment to light balancer rails, shelves, and other
- Optional magnetic mount for attachment to metal surfaces

- Daisy Chain up to 10 fixtures with 1 power source Lengths available: 24", 36", and 48"

  Operating voltage: 90 to 264 V ac (50 or 60 Hz), Power factor > 0.95 on high setting at 120 V ac Lumen output: 600 ( $\pm$ 5%) per foot, typical at 25 °C (77 °F)
- Light color: Daylight white
- Color temperature (CCT): 5000K (±300K)
- Power cord contains simple 3-prong plug, no transformer required
- Swivel bracket available for positioning light throughout workspace
- Built-in skirt/shield keeps light focused on the work space and out of the user's eyes

Overhead Mount Option

Shown with swivel and magnetic brackets, mounted underneath Treston steel shelf.

# Stacking bins and shelf bins

Bin rail M30 with brackets and blue stacking bins.

Light bin rail M30 with brackets and red stacking bins.

Another way of ensuring an ergonomic working position and saving space is to use bin rails. The higher the rails are, the further they are from the workstation. To ensure an ergonomic working position, use the extension bracket pair on the higher rails. The bin rails are available in six standard module sizes.

### Bin rails

### Stacking bins

Our stacking bins have been designed for daily use in stores, production facilities and warehouses. These bins have been designed to fit all standard metric shelves and industrial workstations. Bins of the same width stack securely, even if they are of different depths. Straight sides ensure an efficient use of space.

# Chairs

# High-performance industrial chairs with a 10 year warranty

The new Treston chair range offers high-performance seating solutions with maximum customer benefit for any industrial and technical working environment. Our high-quality technical products fulfill the highest requirements, offer outstanding value for money and meet the requirements of various workplaces – from production and packaging to standing work, ESD areas and R&D environments.

# Industrial workplaces require industrial chairs

Ergonomically sound chair is a vital part of the well-functioning, ergonomic and user-friendly workstation. Good sitting enables effective and appropriate movements, reduces postural fixity and enables good and relaxed working postures. The ergonomic requirements of workplace chairs in industrial and technical environments are inherently different to those of other areas, such as office. The jobs carried out at manufacturing workstations may involve force, precision skills and repetitive movements, and thus the workplace chair must adapt perfectly to these tasks and working environments in order to support the workers – and their well-being- in the best possible way.

### Six models with 36 variations

The new chair range consists of six different models: Multi-purpose Treston Ergo, Treston Plus with an all-inclusive ergonomic package, new generation workplace chair Neon with changeable upholsteries, Flex for standing work, Stool for assistance in workshops and Saddle chair for alternative way of sitting. In addition, there are three surfaces/upholsteries to choose from: a highly resistant polyurethane, comfortable fabric and easy-to-care artificial leather, making it is easy to find the most suitable chair for the working environment from our 36 chair variations.

### Safe, sound and economic solution

Treston chairs ensure safety in the workplace by fulfilling the requirements of DIN 68877 and by carrying the GS safety mark, and in addition, our ESD chairs are in compliance with EN 61340-5-1. Besides being safe and ergonomic, our chair selection has a full 10 year warranty\*. The Treston chair range is a safe, sustainable and economic solution for industrial seating.

Find more information about ergonomic sitting from our separate brochure! www.treston.us/literature

### **Treston Ergo**

### Multipurpose chair for almost any application in the industry

- User-friendly and quick adjustability
- Excellent price-performance ratio
- Large, ergonomically designed seat and backrest and lumbar support

### **Treston Plus**

### The all-inclusive ergonomic package

- Best possible adjustment to body size
- Supports the body in every position
- For any work situation

### Neon

### New generation workplace chair

- All the same adjustments and features as in ErgoPlus
- In addition changeable upholstery and flex strip for protection of the chair and its environment

### Flex standing rest

### For best support in standing work and combined workplaces

- 360° rotation of the seat, easy height adjustment of foot ring
- Space saving
- Slip resistant seat

### **Stools**

- Optimal assistance in workshop and heavy duty applications
- Adjustment for seat height

### Saddle chairs

4D armrests for Neon	Adjustment of height, width and depth with the possibility to swivel.		ARN-ESD
Chrome-plated foot ring	Foot ring can also be retrofitted to our lower chair models by attaching it to the chair column. Can be used on both ESD and non-ESD models. The height can be easily adjusted without any tools.	CRING	CRING

# Carts

# Freedom of mobility with carts

### Increased productivity with mobility

Work is not always confined to a single workstation and tools must be moved around accordingly. Lightweight carts are ideal for this situation, significantly increasing productivity by up to 30%.

Each task is different and requires dedicated tools. Due to their modularity and versatile accessory components, carts are easy to design and adapt to suit a multitude of users and applications.

### Heavy-duty cart

Heavy-duty carts, as their name indicates, are ideal for moving heavy loads. Their special casters support extremely heavy weights.

### Fitter's cart

A fitter's cart with drawers lets you take your tools wherever you go, while keeping them organized. The rubber mat helps keep tools in place while you are working.

### Service cart

The service cart frame is equipped with a safety locking feature that allows only one drawer to be opened at a time.

### Storage cart

An easy solution for mobile storage, the storage cart has an adjustable middle shelf, and the shelves are fitted with standard rubber mats.

### Basic cart

Equip your carts with shelves, tops and other accessories to fit any application, such as transportation or tool storage.

# Heavy-duty cart

Heavy-duty carts, as their name indicates, are ideal for moving heavy loads. Their special casters support extremely heavy weights. The total capacity of the basic model is up to 1320 lbs!

The heavy-duty carts are equipped with two fixed castors ( $\varnothing$  6.3") and two swivel casters with brakes.

### Heavy-duty cart 3,

Order No. C75007103

Top 39.37' x 29.52" Worktop height 37.79"

# For extremely heavy loads!

The total capacity of the basic heavy-duty cart is up to 1320 lbs.

# CARTS

# Fitter's cart

A fitter's cart lets you take your tools wherever you go, while keeping them organized. The rubber mat helps keep tools in place while you are working and the drawer unit comes equipped with a safety lock that prevents other drawers from opening while one drawer is open. This helps to keep the cart in balance – even with heavy loads.

The fitter's carts are equipped with four swivel casters ( $\varnothing$  3.94"), two of which have brakes. Fitter's cart can be combined with all M30 accessories.

# Drawer units

DRAWERS

Since work is not always performed in the same place, we provide a comprehensive range of different drawer units for a variety of purposes. You can fix any drawer unit from the same series under a worktop or on a base unit, or equip them with casters to take along to your next workstation.

### Efficient storage and control

Our drawer units are great for storing tools and supplies. It can be surprising how much time is spent finding tools and other items if they are not stored systematically. The versatile interior combinations of our drawer units guarantee that your supplies are always at hand and organized.

### A comprehensive range of drawer units

We promise that you will find a drawer unit that meets your requirements in our comprehensive range. You can choose from several different heights and drawer and interior combinations. We have selected some combinations for this brochure. For more options, please contact: infousa@sovella.com.

### Drawer units for heavy loads

These robust drawer units are ideal for storing heavyweight supplies and tools, for example in a repair workshop or in the engineering industry.

# Drawer unit 55

With these drawer units you can optimize your storage and keep all your items perfectly organized. The safety locking prevents other drawers from opening while one drawer is open (we recommend locking the drawers during transport). You can choose the best option from three heights to meet your needs, or add height or width with different drawer unit combinations.

21.65"

26-inch-high drawer unit includes optional casters, making it an excellent choice for a mobile workstation. The unit with casters comes with a rubber mat that stops items from sliding on the surface. The version with doors is ideal for storing larger items. The 1.97" high drawer is fully extendable with a load capacity of 88 lbs. The other drawers are 85% extendable with a load capacity of 176 lbs.

The units also serve as workbench legs and the shallower drawers are easily fastened under a workbench. The Choose the drawer unit according to your needs; with castors, base or no base.

21.65

Cart model: load capacity 660, 2 fixed castors, 2 swivel castors with brakes (ø 3.94").

21.65"

Middle plate	854103-49

Always remember to lock the drawer unit during transport! Less than 19.68" deep, this drawer unit is ideal for use in narrow spaces, such as in vehicles. The units come with a rubber mat that stops items from sliding on the surface. The drawers have ball bearing runners and safety locking which prevents other drawers from opening while one drawer is open.

This same drawer unit is used in the service cart with castors p. 48. The drawers are 90% extendable and their load capacity is 110 lbs.

# DRAWERS

# Drawer units 70, 90 and 130

You can fit an amazing number of things in these spacious drawer units. Choose the one that best meets your needs from two heights: 43.31" and 55.12". The 43.31"-high drawer units include a cover that doubles as a worktop with a rubber mat. This is the ideal height for working standing up.

The safety locking prevents other drawers from opening while one drawer is open. The drawer unit can be moved with a pallet truck or a forklift when the base front plate has been removed. The drawers are 100% extendable and their load capacity is up to 440 lbs.

# NEW: All the drawers are 100% extendable, also available with a load capacity of up to 440 lbs!

The drawer units 70, 90 and 130 have been updated; all the drawers are now 100% extendable. The load capacity of the standard drawers is 165 lbs, but all the drawer units are available with drawers that have a load capacity of up to 440 lbs!

The drawer units with the load capacity of 440 lbs are indicated by a product code having an H in the end (e.g. 61307001H).

# N DUSTRIAL SHELVIN

# Industrial shelving and cabinets

# Industrial shelving and cabinets

Shelves and cabinets help keep the workplace well organized. During selection the space available and load capacity required must be taken into account. Shelving units are also excellent as room dividers. ESD protection is also available.

### Extended tool life

The service life and condition of tools can be significantly improved through their appropriate storage. They are stored in their own places, protected from dust and dirt, in a locked cabinet.

# A versatile storage solution is created by using suitable accessories

An open shelf is not always the best way to store things. Tools, expensive equipment, and small items need another type of solution. Through using lockable drawers or adding doors and panels, an open shelving system is

turned into a versatile storage solution. Drawers can be fitted with a variety of interior combinations, to suit the tools stored in them.

### Storage system is modifiable

A storage system is built around the basic component: extension parts, doors, screens, and other accessories can be added to create an efficient overall solution. In addition the shelf heights can easily be adjusted as needed. Even the load capacity can be increased by adding additional supports.

#### Heavy storage system is designed for heavy items

When the items are heavy, shelves need to be very strong as well. Computer servers or large measurement instruments can be surprisingly heavy. A heavy storage system is designed for load capacities of up to 880 lbs/shelf.

## Industrial cabinets allow for a tidy, efficient working environment

No unnecessary time should be spent looking for tools and materials. This interrupts work and causes stress. In a well-equipped cabinet, everything is where it should be. A ready-assembled cabinet is easy to move to the most convenient location. There are adjustable glides under the cabinet. This makes it easy to adjust the cabinet so that it stands straight on uneven surfaces. All module-M30 and -20 accessories, such as shelves, drawer units, perforated panels, and extendable shelves, can be used in selecting accessories for the cabinet.

## Storage system

Storage system can be built as a combination of cabinets and shelves and you can use it as a space divider. The storage system is available in two standard heights: 78.74 inches and 94.48 inches and two widths: 31.49 inches and 39.37 inches.

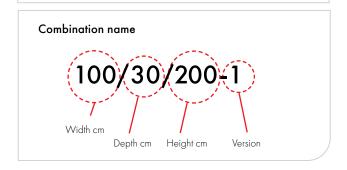

#### Standard bays

## Shelving cabinets

Shelving cabinets are made of epoxy powder coated steel. The frames are painted with light grey RAL 7035 and doors either with blue RAL5007 or with light grey RAL7035. The cabinet has sturdy double leaf-doors, flush fitting handle with two keys. Shelving cabinet can be moved with fork lift when it is empty and there are leveling screws under the cabinet for adjusting the cabinet straight. The shelving cabinets are pre-assembled.

Loading capacity 330 lbs/shelf, 1322 lbs/cabinet.

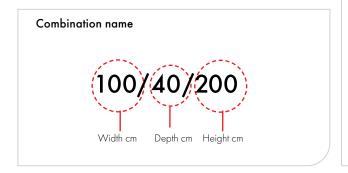

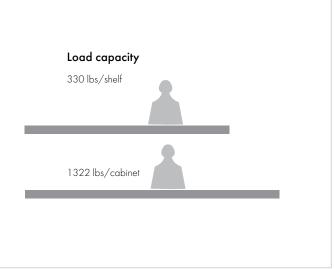

Name	Size WxDxH in	Order No
Shelving cabinet 100/40/200	40.55"x16.93"x79.13"	SC10040200-07

Shelving cabinet 100/60/200	40.55"x24.80"x79.13"	SC10060200-07

#### The W x D x H rule

All our dimensions follow a WDH rule, where the first dimension is the width (W), the middle the depth (D), and the last the height (H).

## Storage and charging cabinet

A storage and charging cabinet is ideal for storing personal valuables during the workday and at the same time it provides a possibility to charge mobile phones/tablets/laptops. The storage and charging cabinet consists of six lockers and each locker is equipped with a double socket and a secure electronic code lock. This electronic locking system replaces keys with a numerical code.

The locking system is operated with  $2 \times AAA$  batteries and is thus independent of an external power supply. Due to an automatic low power (sleep) mode, the batteries are long lasting, and even when the battery power is low, the lock can still be opened up to  $300 \times 10^{-2}$  times.

Storage and charging cabinets are made of epoxy powder-coated steel. The frames are painted with light grey RAL 7035 and doors either with light grey RAL 7035 or with red RAL 3002. On the back panel of the lockers there is perforation for air ventilation. The inner measurements of the lockers are D x W x H 12.2" x 16.93" x 8.07" . Storage and charging cabinets are pre-assembled.

Name	Size $W \times D \times H$ in	Internal locker dimensions in	Order No
Storage and charging cabinet, grey doors	13.78" x 21.26" x 60.04"	12.2" × 16.93" × 8.07"	SCC-41
Storage and charging cabinet, red doors	13.78" x 21.26" x 60.04"	12.2" × 16.93" × 8.07"	SCC-25

## Industrial cabinets

Treston industrial cabinets include a wide range of accessories e.g. for tool storage, allowing a versatile storage solution to be created.

NEW:All cabinets are also available with flush fitting handle lock or digital code lock.

Alternate locking method can be ordered by adding a T or E in the end of the product code (e.g. C309 07 000 T).

**T=** for flush fitting handle.

**E** = for digital code lock

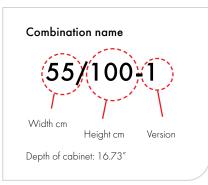

Both locks are also available to the industrial shelving system and heavy shelving system cabinets.

#### An extendable shelf for the cabinet

When the cabinet is used for storing folders, a separate extending shelf is a good idea. This shelf makes it easy to browse through the folders.

## Industrial cabinet accessories

All the M30 accessories fit the cabinet 80 and can be easily installed inside.

Cone rack with hooks

# Perforated panels

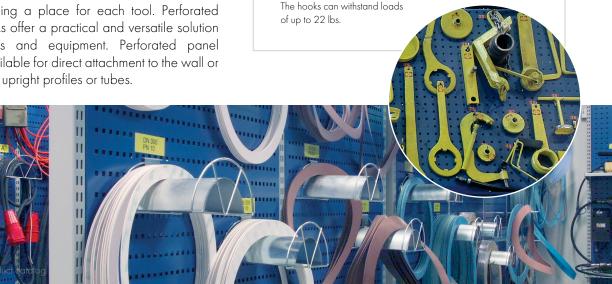

PERFORATED PANE

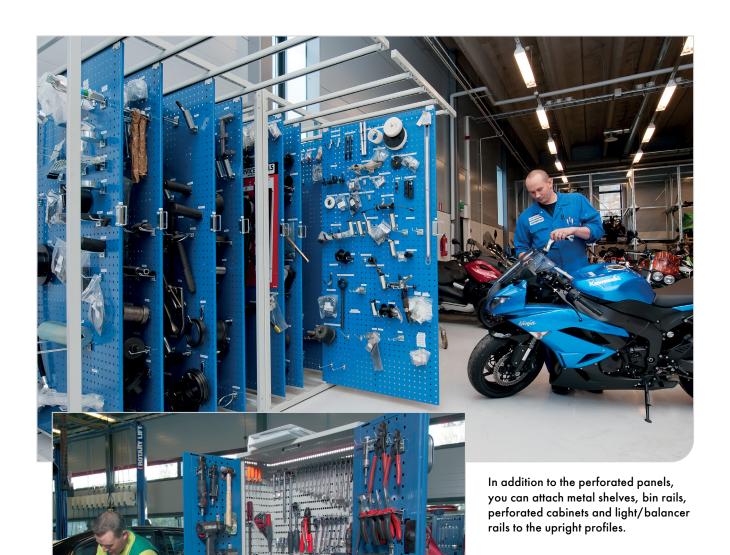

Perforated panels are efficient dividers of space and, at the same time, practical storage facilities for tools and equipment.

#### Order and tidiness are appreciated

Order and tidiness cannot be achieved and maintained without there being a place for each tool. Perforated panels and hooks offer a practical and versatile solution for storing tools and equipment. Perforated panel products are available for direct attachment to the wall or for attachment to upright profiles or tubes.

Hooks also for heavy loads

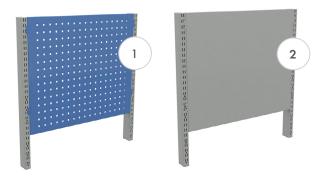

## Perforated back and wall panels

The perforated back panels are fastened to the upright tubes or straight to the bench with panel hooks. The perforated wall panels are attached, either directly to the wall with screws or to the upright profiles with fastening clips. The size of the perforation is  $.35'' \times .35''$ , center to center 1.49''.

#### 1. Perforated panels for upright tubes

The wall module requires two sr	pacer hars	

The wall module requires two spacer bars.

<sup>\*</sup> The insulation material used is polyether foam.

## Tool Storage System

Tool storage system requires only 21.52 sq. ft. of floor space and provides 172.22 sq. ft. of storage space. There is no need to fasten it to the floor, as it stands firmly on its own. There is a castor on the lower edge of the panels which makes them easy to move.

The load capacity is 220 lbs/panel. Includes 4 panels; additional panels are available (ordered separately). A maximum of 10 panels can be attached to the tool storage system.

#### Tool storage system

Name	W x D x H inches	Order No
Tool storage system, 4 panels	40.35 × 40.74 × 83.66	830518-07P

Cabinet enclosure kit	40.35 × 40.74 × 83.66	14-839522-49

Cabinet style tool storage

## Treston Tower storage and

workstation unit

Being versatile and easily customisable for different environments and tasks, the Treston Tower storage and workstation unit is ideal for, for example, vehicle and machinery assembly lines, service and maintenance departments, and for any work that requires plenty of mobile storage and workspace near the product under work.

When the storage and/or load capacity of a wheeled service cart or drawer unit is not enough and you need a unit that is easier to move than a fixed workstation and can be equipped in many ways, the Treston Tower storage and workstation unit is the correct choice.

The frame is made of powder-coated steel (grey, RAL7045). Accessories and add-on products are available in light grey (RAL7035).

#### Treston Tower storage and workstation unit

Name	Size W x D x H	Max load lbs	Order No
Treston Tower frame	33.86" x 34.65" x 77.17"	2200	890700-45
Treston Tower frame with castors	33.86" x 34.65" x 82.87"	1322	890701-45

#### Wide range of accessories and add-on products

Because the frame is equipped with the M30 upright frame module, almost all modular size M30 accessories are compatible with the Treston Tower storage and workstation unit. Also remember the tool hooks (R hooks) and stacking and shelf bins.

#### Examples of accessories and add-on products

		p

## **Product Specifications**

Workbench, cabinet, shelving and drawer frames are all light grey (RAL 7035) or dark grey (RAL 7045). Outside of the standard color range, additional colors are available on request. Please contact our agents or email us at: infousa@sovella. com.

	Color code	RAL code	Doors	Drawers	Perforated panels and back panels
Light grey	49	RAL 7035	STD	A/STD	A/STD
Light grey *	41	RAL 7035	STD	A/STD	A/STD
Dark grey	45	RAL 7045	А	Α	Α
Blue	07	RAL 5007	STD	A/STD	STD
Red	25	RAL 3002	Α	А	A

The color code is included in those product codes that are formed with numbers.

It is either at the end, following the hyphen (e.g. 860 804 49), or in the middle (e.g. C33407,000).

\*49 is ESD protected light grey, 41 is non-ESD protected light grey. Please remember that ESD protection will result in a slightly darker shade of color than the given RAL code.

STD = Standard factory color, normal warehouse delivery
A = Factory color, contact a sales representative for delivery times and pricing

RAL 3002

### **ESD** Paint specifications

Sovella workstations and related products are finished with a semi-conductive Epoxy/Polyester Powder. The surface resistance of the Sovella proprietary paint formula is 1.0 - 10 MOhm depending on a film thickness and with 100 voltage. The paint comes up to the specifications of SP Method 2472. The resultant paint film has excellent mechanical properties, i.e. abrasion and impact resistance and elasticity. It is not scratched easily and withstands action by chemicals, greases and solvents. It has good anticorrosive properties.

#### Treston® Storage Bin Colors

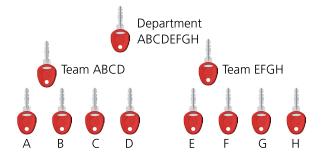

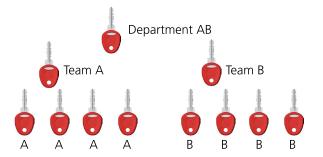

Printed colors do not give a fully accurate representation of painted colors. Please ask a Sovella representative about various samples.

## Three-level locking system

Sovella products can be equipped with a three-level locking system. This allows both serialization of individual and identical locks.

Contact your Sovella representative for additional information. The locking services must always be specified with the order.

#### Serialization of individual locks

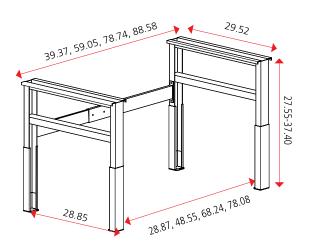

Each drawer or cabinet has an individual lock in a production unit, but a master key opens all the locks of the unit. The master keys can also be serialized and the third-level key opens all the drawers and cabinets of all the production units.

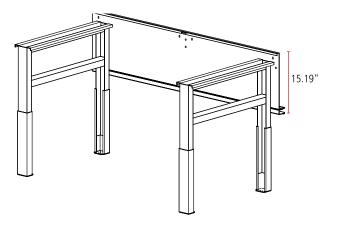

#### Serialization of identical locks

Each team member needs only one key to access all the drawers and cabinets in a production unit. A master key opens all the drawers and cabinets of all the production units and can also be serialized.

## Workshop™ Workstations

- Adjustable leg set can support 1650 lbs. per leg pair. Height adjustable 27.55" to 37.40" without top.
- Leg depth is 29.52".
- $\bullet$  Upright attachment frame available in sizes 39.37", 59.05", 78.74", 88.58".
- When uprights are not required, the legs can be connected using spacer bars. Adjustable 39.37" to 59.05" or 59.05" to 88.58".
- Drawer pedestal 55 can take the place of a leg.

## Cornerstone™ Workstation

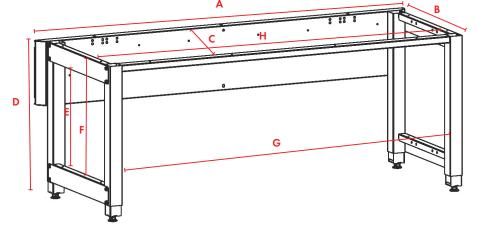

- Cornerstone<sup>TM</sup> worktable frame consists of one right and one left lower "H" leg. Upper horizontal front rail and upper horizontal rear structure for structural stability and slotted upright attachment.
- Cornerstone™ worktable frame can support 2000 lb load, evenly loaded.
- Frames are available in widths: 47.24", 59.05", 70.86".
- Height adjustment from 27.56"-40.55" in 1 inch increments. Telescoping leg parts are set with through bolts.
- Table frames can be easily equipped with any 12mm stem casters.
- Slotted upright mounting brackets are included.

#### **Steel Thickness:**

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Attachment parts for bolts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

	48"	60"	72"

## **TP Workstation**

- Sovella® TP worktable frames consist of a pair of legs, rear case, and front rail.
- Sovella® TP frames are available in 30" depth.
- TP frames are available in widths: 48", 60" and 72"
- Table frames can be easily equipped with any 12mm stem caster.

#### Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Leg attachment parts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

## Concept<sup>TM</sup> Workstations

- $\bullet$  Concept  $^{\text{TM}}$  worktable frame consist of a pair of legs, rear case, and front rail.
- Depth of Concept<sup>™</sup> table frame is 23.62", 29.5" or 35.43" with the use of depth kit.
- $\bullet$  Concept TM frames are available in widths: 39.37", 47.24", 59.05", 70.86" and 78.74"
- Table frames can be easily equipped with any 12mm stem caster.

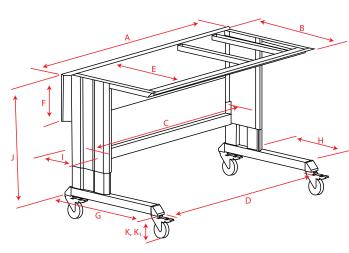

#### Steel Thickness:

Steels used in the construction of the frames are 12, 14 and 16 gauge CRS steel, except as follows:

- Leg attachment parts: 7 gauge CRS steel
- Cable rail: 20 gauge CRS steel

#### Concept<sup>TM</sup> Workstation - Manual

- Leg pair Concept<sup>TM</sup> 30 can support 1100 lb load, evenly loaded.
- Concept<sup>TM</sup> 30 can be equipped with tilting mechanism. The tilting frame is for width 59.05". Tilting frame is equipped with motor, which can tilt 85 lb load. Maximum tilting angle is 50 degrees.
- Height adjustment of Concept<sup>TM</sup> 30 frame is 26.62" 44.34" with 1" table top and adjustment glide. Height adjustment is made by adjusting telescoping legs and tightening friction screws on the back and sides of the legs.
- Table frames can be easily equipped with any 12mm stem caster.

#### Concept™ Workstation - Hand Crank

- Pair of legs of crank frame can support 440 lb dynamic load, and 1100 lb static load, evenly loaded.
- Frames are available in depths of 23.6", 29.5" and 35.43"
- Frames are available in widths of 39.4", 47.2", 59.1" and 71.1".
- Height adjustment of crank frame is 27.6"-41.4" with 1" table top.
- The crank handle can be installed on the left or right side of the frame. Standard table configuration is right hand crank.
- Height adjustment change one inch per each full rotation of the crank handle.
- The crank folds away under the frame when not in use.

#### Concept<sup>TM</sup> Workstation - Motorized

- Leg pair of Concept<sup>IM</sup> motorized frame can support a static load of 1100 lbs, evenly loaded on a worktop and a dynamic load of 660 lbs, evenly loaded.
- Frames are available in depths of 23.62", 29.52" and 35.43".
- $\bullet$  Frames are available in widths of 39.37", 47.24", 59.05", 70.86" and 78.74"
- Height adjustment range of Concept<sup>™</sup> motorized frame is 27.80" -43.55" with 1" table top and adjustment glides. Adjustment is made with 2 linear actuators, using an up/down memory desk switch.
- The speed of the frame is .70" / sec without load
- The speed of the frame is .59" / sec with load

- The desk switch can be installed on the front, left or right side of frame.
- The desk switch has multi position memory system to be able to set the frame to three customer based heights and up-down buttons for random settings.
- All units have soft-start and soft-stop circuitry.
- The table can be manually driven over the memory positions.
- Silent operation (45 db (A) DS/EN ISO 3746
- Capable of operations in ambient temperature 41 to 104 degrees Fahrenheit

## Slotted Upright Modules

- Upright module consist of a minimum of 2 uprights, which are installed with the correct spacing for the desired module size (see table).
- Upright modules can easily be extended to create double modules (3 uprights needed) or triple (4 upright needed) etc.
- Each upright can support loads equal to the maximum load limited by

table frame or accessories in use.

• For accessories the height adjustment steps are 1.1".

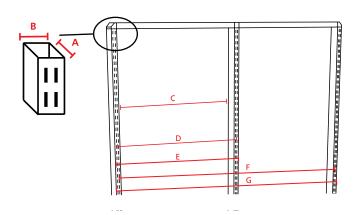

#### Steel Thickness:

Steel used in the construction of the upright is 14 gauge CRS steel.

Contact a Sovella representative for more information on counter mounted upright mounting locations.

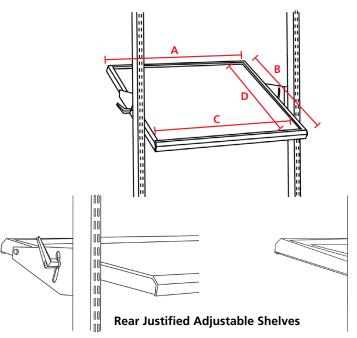

## Shelves

#### **Adjustable Shelves**

- $\bullet$  Shelves are available in widths of M20 (19.7"), M30 (29.5") and M36 (35.4").
- Loading capacity for standard adjustable shelves is 220 lbs.
- Loading capacity for the depth adjustable shelf is 110 lbs.
- Shelves are available in depths of 19.9" and 25.6".
- Shelves can be adjusted as horizontal or tilted (+/- 25 degree).
- Shelves have chamfered edges in the front and back
- Shelves can be mounted at different depths: front justified, in the middle or rear justified.
- Depth adjustment allows for 9" of adjustment on 20" deep shelves and 14.5" on 26" deep shelves.
- Height adjustment is in 1.1" intervals.
- All shelves have a mat: ESD-mat or rubber-mat for a non-slip shelf surface.

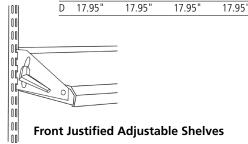

#### **Steel Thickness:**

Steels used in the construction of the products are 14, 16 and 20 gauge CRS steel

## General Terms

Freight is FOB shipping point, Canton, GA. Freight will be pre-paid and added to the invoice or freight collect according to your written instructions. We will coordinate shipments with your representatives. If the job site is not ready to accept shipments at the time scheduled, we will not be responsible for moving material in or out of storage or other job site locations and any costs incurred. "FOB shipping point" indicates the buyer pays shipping cost to the end user, and takes responsibility for the goods when the goods leave the Sovella's premises or the premises of the Sovella subcontractor when drop shipping direct from the Sovella subcontractor to the end user.

Worksurfaces – While we will always try to ship all products together, due to delivery situations, and order size worksurfaces may need to be shipped directly from our plant in Bow, NH. A confirmation of this decision will be sent to distributor at time the order is placed.

All material is shipped knocked-down unless otherwise noted. Assembly and installation is not included unless otherwise noted on the order.

Receipt of goods must be inspected and inventoried. Any shortage must be reported in writing within **48 hours**. Sovella's freight terms are FOB Canton, GA. Any freight damage should be noted on the freight bill at the time of receipt. Claims should be reported to the freight company directly as soon as possible. Sovella will assist in the claims process but cannot file the claims.

Return policy; All returned goods require a RMA number (Return Merchandise Authorization) issued by Sovella, Inc. prior to the return of any goods. All Requests for return authorization must be within 60 days of original invoice. All returns should be packaged so that it is returned in re-sellable condition; returned freight prepaid. Upon receipt and inspection of product, Sovella, inc. will issue an 80% credit against applicable invoice if product is deemed re-sellable. Custom or non-standard products may not be returned.

Authorization of partial shipments requires written approval from the distributor and acceptance by Sovella, Inc.

#### Terms are NET 30 days from the date of invoice.

Warranty: Steel construction and weldments, (5) five years from date of shipment. Mechanical cranks, fixtures and devices, (1) one year from date of shipment. Electrical motors, fixtures, and devices, (1) one year from date of shipment. All in accordance with established Sovella warranty statements.

All products are Sovella gray (RAL 7035) in color unless otherwise noted. Special paint colors may incur an additional cost.

All items noted with ESD properties are guaranteed to meet ESD requirements specified in the IEC-61340-5-1 standard. Connection, grounding, any local requirements and verification of same is the responsibility of the end user.

Change orders to the items listed above are to be detailed in separate correspondence including any modifications in price.

Sovella will not accept any contract or agreement that contains any penalties or liquidated or actual damages.

## All orders are subject to credit approval by Sovella, Inc.

Any order under our \$100.00 minimum will be subject to a \$25.00 handling fee. Spare parts excluded.

#### Packaging

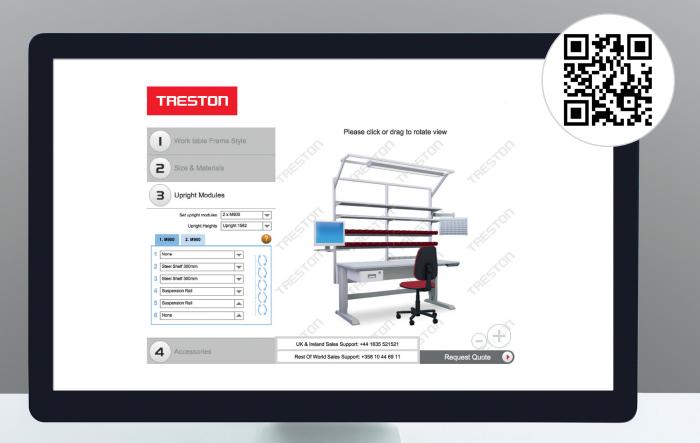

Sovella takes pride in protecting our shipments from damage. Shipments are carefully packed to ensure shipments are received damage-free. Upon shipping, "DO NOT STACK" cones are placed on top of the boxes. A photograph of the shipment is placed on the outside of the package to display the state of the shipment as it is shipped. The photograph provides photo proof to the receiver as to the state of the shipment upon departure from origin.
